

449th Knowledge Seekers Workshop; September 8, 2022 (Quick Index 23p; Intro, Topic, Transcription, Proofed Need to; Key Phrases, Words) (Auto transcription from Elias)

Teachings of Emotions; feeling sound through Soul - Green tea; Body both Vacuum and Centrifuge conditions; Teaching on multiple vacuums inside each other - Solar System; Why Bones in center; Creating perfect Children; Actions of forefathers effects children; Transmutation by agreement only; One Nation policy; Cruise ship for One Nation; Video of Vineyard - 150% increase in harvest

Topic Index

Soul has to be willing to transmute; Collective transmutation; New camera - take pictures with Soul and with the emotions; "Sound of drinking tea" - feeling through the Soul, accessing all the knowledge through sound by soul - type, taste, qualities; Soul smells carried in transmutation; For now transmutation only for Earth conditions; System will tell who is not from Earth; Transmute you around Earth through mobile phone network; Send Soul to Moon via laser beam; Test - if KS can feel sound of drink; Mr. Keshe opens his Soul to whole of creation - connect to it; Water touches mouth in Gans state - all cells feel it;

Teaching on Vacuum and Centrifuge; Earth is being pulled into Sun; Earth is in centrifuge and a Vacuum condition of the Solar system; Solar System even higher density of Galaxy; Multiple vacuums one inside another; Matter state atmosphere Earth lightest goes up - in Vacuum opposite lightest goes closer to center; Gans's keep field forces separate from each other; Gans's in body keep separate from each other; Plasma condition stronger fields in center G - weaker outside M; (All plasmas pulled to center - "gravity"); This is how Soul matures to reach separation from P; How do we understand to keep one dimension separate from another to work with it; Bone structure of man appears that heavier is in the center - must consider vacuum within a vacuum - "ray of light" condition; Bone Marrow creates field rotation - can suck lymph through; Body in vacuum higher than cosmic level; Understand body has 2 conditions Vacuum and centrifuge of field forces; Remember every cell has Ca in it - Fe rotation in blood; Bone holds onto next vacuum which is muscles; We need to understand this to create life in other dimensions when transmute; EU will help to understand true process of creation; Paralyzed people walk - convert emotions into fields of U - within U of body; Nearly all man's problems because lack knowledge of creation; Essence of the Soul is a plasma of itself, before it again becomes another cycle of matter state; Push to extreme becomes opposite (Yin becomes Yang) Acid becomes Alkaline; Voltage becomes Current; Next Teachings you'll feel emotions of life - you will actually feel what the other is going through; You understand someone else's pain because you connect to the fields; If you want to visit another Soul they have to agree to see you; If both Souls are sincere they achieve the flight; Green tea is black tea leaves fried when fresh they become Nano layers - you actually drink a Gans - full of energy; Mr. Keshe explains in detail about his love for green tea the emotion it brings him - that was the sound you were supposed to

feel; It takes so much energy to teach KSW needs time to recover - Green tea helps with energy; Human introduced him to Green Tea on Planet Zeus; Would your emotion be tainted with desire?; At Soul level separation is impossible unless both Souls agree; Commitment for life of Soul; Becomes a life without pain; Children created from Soul - true reflection of light of Creator; Children of Mitra - pure - come from best lights of the society they join - fit into to any society; Mitra's children are not Adams children on this planet - they are the start of a new creation for whole of U Community - Unicose; UC will make Mankind to understand; You can know what I drank through your emotion; Feel the essence of my soul wanting to share it with all of you; Did you take a sip from the Cup of Life of the Creator - then you understand the Totality of the Creator; Did it enlighten your Soul; Detachment means I want to enjoy the totality of life - not part-time lover; Schizophrenic bringing out multi-personalities in EU - male - female - would their parents accept; (Do system centrifuge your fields and bring out in other system?) How would you appear in P in the other system?; Test in EU how you will look before you go to new destination - how many arms and legs needed; Easier to transmute in Linz because field strength same from one system to other; You will feel and communicate with Souls without seeing them; Does man need emotion of language and voice to communicate; How far do we push ourselves to understand; Establishment of One Nation organization to supply all food, energy and needs of mankind; Waiting for best time to intervene; We'll release new T that everybody can use immediately;

Painting made with Gans's colors change with your emotions, part of plasma research; One Nation Policy; STM seen as light to UC - Sun and stars are light - but planets in matter state; Tea remains matter state until you put in mouth; Communicated with Chinese couple through Soul; I accepted to live the life of the man; In life of Soul nothing is hidden from you; Worst thing when Mr. Keshe withdraws love - because it is a full love of Soul - when broken move away from pain; Your action has to be perfect, because you do it to yourself; Psychosomatic means you make your own illnesses; Green tea has connection to Soul through Nano materials - most diseases would not exist; Your Souls decides if you transmute or not; Question about whether man will understand - answer is about how our emotions change and control us ; Life in college - emotions of Iranian food - how to understand our emotions and interactions - brings comprehension of totality; Loving someone of different language - not understanding emotion of language; "Tarof" in Iranian culture say yes, but mean no; Using Gans's and meeting people you don't like - find out problem with myself - want to deny; Left side breast cancer in EU - resolve issue with Souls of mother; 1.6 billion cruise ship to be scraped - could be floating center of One Nation government; Emotion of Soul to transmute - you already have it within you - you deny it; We prioritize P over Soul; Aware of Soul in womb - hear our parents; Early Childhood diseases related to emotional conditions of parents during pregnancy; Loving and caring parents give beautiful children if it is true; Physical beauty is skin deep; Takes enough love and energy to raise only 1 Soul to perfection and maturity; China's one child policy; Thoughtful question by KS - breaking Coulomb's barrier releases lot of energy - light; Energy in body equal to 18 Hiroshima bombs; Bomb just releases massive energy - how does it effect us - enlightening or ; Physical problems we see from birth are from actions of forefathers, Soul may also want to elevate others we are here to serve; Grandparent pray for grandchildren 20 years before born; True life

of Mitra; A world leader understood that his actions effect his future generations - acts very cautious to be correct; It's not only actions - but the effects of the actions of our ancestors both good and bad; Video of Gans' used in vineyard and fantastic results 150% increase in harvest ;

Introduction to 449 KSW

There is a lot about emotions in this workshop, becoming aware of our Soul and gaining confidence to use its abilities. Mr. Keshe tested KS in our ability to feel the Soul Knowledge through sound, and even to take pictures with the Soul through our emotions. The main obstacle is our lack of confidence in using our Soul, and not putting our Soul as a priority in our life. He said, that we were in touch with the Soul when we were in the womb of the Mother, and could feel our parent's Souls, but when we came out into this world, we started paying more attention to physicality and lost the ability. Now we have to get it back, because with the new technology we need to be able to feel our different souls and work with them.

This also means we need to know the true feeling of our Soul, because that is what will allow us to transmute. So becoming aware of denied and buried emotions is very important for the upcoming work. He gave a very good example of this, when a lady with breast cancer on the left side, which means issues with mother or daughter. When she went into the Enhancement Unit (EU), she was able to work out undealt emotional issues, with the Souls of her mother and grandmother.

It seems understanding about the emotions kept coming up again and again in this workshop. There were the paintings that were done with Gans's and the colors will change according to the change in emotions of the people close to them. In China he communicated with a couple through the Soul, through feeling, and they understood each other. Mr. Keshe gives his love fully through the Soul, and if that is withdrawn, it is painful beyond pain. Psychosomatic illnesses are where the emotions manifest physicality through the Soul - this happens when we are unaware of our Soul and our true feelings, maybe they are too painful to allow ourselves to feel and deal with them.

When asked about man not being able to learn much and that he has to repeat the same thing over and over again, and to feel the pain of man's slow progress, he replied by telling a story of his college days and the emotions he felt when he climbed the 5 flights of stairs to his apartment, and he had to pass many different Iranian cooking smells along the way, where each brought an emotion he knew from growing up in Iran. The point seemed to be that man changes his emotion very easily, and seems not to be aware of those interaction or have much control over them. And that the emotions are so much a part of man's life, without him understanding his emotions, let alone being able to control them. Then the next thing he taught was, that you won't have this problem when you live in the Soul. The Soul is pure, clear , and transparent like the light of the Sun.

Another aspect of emotions are that many of the early childhood diseases start in the womb, where even the fetus feels the emotions of both parents, but that parents don't

understand this. These emotional damages can follow the child throughout its lifetime, if not dealt with. He explained that it is more than enough for parents to have a single child if they give all the love and care it needs to reach maturity. And the difficulty of loving someone of a different language, when you don't understand the emotion of the language, maybe the true love is not getting expressed and the relationship falls apart.

This is the workshop of emotion and it needs time to ponder it over and over. In addition there is a very important teaching on field forces in the universe and in our body. That both vacuum and centrifuge conditions exists. This explains a lot of things our science has missed. For example, why the Earth is moving towards the Sun, and why our bones are in the center of the body, but in the skull they are to the outer side. This has to do with vacuum conditions inside other vacuums, and the centrifuge condition, or rotations. One last thing, sincere Souls will achieve transmutation.

Thank you for listening.

Quick Index

We are putting the last pieces together to begin the transmutation and transportation from one system to another. Will we succeed? How willing are the passengers. The person may be willing, but the Soul says, "no, no matter what you do, I am not moving, because I'm not ready." Or for whatever reason.

We have to understand the Totality of the structure. We have to see if we can transmute the Soul first. (The first group of people (may) not see their physicality (P) going from one system to the other. First we want to see if they can feel their Soul moving from one system to the other. This might take us a few days or even a few weeks.) First we master the art of the transmutation of the Soul. Then with you, we decide, what you are going to dream, and all of you will have (the same) dream. (That dream will be, arriving at) the chair on the other system, and that's it. Your aim will be, "I want to see myself physically in that chair." Can I feel the essence of myself, on the chair in the other system.

(People have said they could visualize the transmutation, or at least have the feeling of the visualization. So it's not as easy as some may think. It's not like the NASA launch, where you see everything in physicality. But with after spending \$30 billion, a little valve malfunctioned and they had to abandon the mission.) This time we are working in the dimension of the field of the Soul of the Man (STM), where you are the captain and you decide whether or not to take off or not. It's not in our hands anymore.

In the past few weeks, we kept to this criteria, of it being your decision. A German and a Russian couple came in and they both decided together to see the Russian version of Jesus Christ. It was because they both made the decision together, that they achieved it. One in the intention and dimension (D) of the light, recognizing, and one in the D of visualization, as a field. This is a very vital point for us. (This along with the experience

of the couple last week who decided to go home together.) The two souls agreed as soul mates, to do things the same way in the dimension of the evolution and transmutation.

These experiences gives us the opportunity to explore what we call, collective transmutation. (If for example, a family of 3 wants to go to the Moon, they will go. However, if the little girl wants to go to the playground instead, because it was the parents who wanted to go to the Moon and not her. She just went along with them because they were the parents. Then she'll be left behind, because it was not to her satisfaction to go to the Moon.) It comes to the point, that we cannot lie. The decision has to be a collective agreement at the Soul level, and not just verbal.

(It will be the same next week, when we start the new systems. You have to sincerely want to be transmuted to the other system.)

Most probably these will be the first couple, which we will land on the Moon, because they have a collective understanding of the work of the Soul, (and their Souls have bonded with each other). We'll give them a camera, or when they come back, they can register their emotion in a different dimension.

(In the history of Man, one man could never say how another man looked until painting was developed. Then the man went further and developed still pictures, movies, and now the hologram.)

(There is a new dimension of visualization, that is unknown to man, which will become available through the dimension of transformation of knowledge (into) pictures. I can transfer what I see, to you, through the soul. There is no need for a camera. And if I don't want anybody else to see it, they won't. I decide who sees the picture I send.)

(If two Souls are talking and they see something, they can transfer the same picture to you. At the moment, this new kind of picture taking through (transmutation and transportation) is unknown to man. We'll gradually introduce this T in the coming time.)

(When we land this couple on the Moon, we'll (allow them to take these (??) new kind of pictures. We'll teach them how to use the dimension of the Soul to memorize and remember the beauty, and nothing will be hidden. You will see the full dimension, including the emotion of the picture. At the moment, you don't capture the emotion along with the picture. In your videos, you see the laughter, (but you don't feel,) or know what's happening on the other side, who's making this person to laugh.)

(With the new knowledge you'll see everything, because you go through the dimension of emotion, the sight of emotion, and the emotion of the laughter. The emotion of the what we call, sound, everything will be together, and it will be transmuted from one (place) to the other.)

(In the upcoming development, maybe the first 10 people will not transmute, because their Soul is not (ready), even though physically they want to do it. The beauty of the new technology, is that we cannot force you.)

You cannot force anyone to do anything. But you can put it on their plate, and if they like, they can take it. The new transmutation system opens up a new life, a new understanding. It'll define and explain a lot of things, that we as a human race never understood in the world of Creation.

Mr. Keshe makes a deliberate noise of pouring a liquid into his cup. (The idea is that we are to practice hearing or feeling through the Soul.)

With the new understanding of transmutation, (we will be able to connect to the essence of the soul of the noise, and you will be able to tell if it is a tea, what kind and color it is, or if it's sweetened, (and all knowledge's). You will know if it is an orange or apple juice, and if it was sweetened. Or was it a coffee, decaf or regular? Because this is the new level of the understanding of the emotion of Totality. This the new cycle of knowledge will be opened up to man.)

(When someone asks you what you are drinking, they will already know what it is by the Soul. Everything in this new dimension will be open to Totality.)

You will see all these changes that are to come. In the coming time we'll introduce the Universal Energy system, which all of you will receive energy, food, and everything else you need. All the misguided works, that the man does to himself, will be a thing of the past. Peace will come on this planet, when the technology of the Creation is understood. It will not come by watching a magic show, but by understanding the knowledge of Creation.

Next week we will start the transmutation from one system to the other. Will people be able to smell themselves when moving from one machine to the other. What happens if we give you perfume in the dimension of physicality, will the Soul smell it in the other machine?

At the moment, our systems are made only for the human race. It's a system that carries the specific conditions of Earth. (We will open to other creatures of the U, but first we have to see if we can handle it. We have to know if our own structure can respond to the Totality.) The big question is, what are we going to do when those who are from other dimensions of the Universe enter the system.

A second outcome is, that by setting the parameters to the conditions of Earth, we will know which one of you is not from this planet, when you enter the system. Even though you feel, touch, eat, and you create children in the dimension of humanity.

This will open for us a new dimension in accepting that we are already a part of the Universal Community. They are living amongst us. We respect and honor them. We don't stigmatize them, rather we try to understand and respect them.

The new flight system will tell us that you are from such and such a planet. Then if you want to go to the Moon, we'll have to change our system to fit you, that way you can have the same pleasures that the man from earth does. At the same time, we have to understand how we bring these positions into a working condition.

(One of the easiest ways to move you on Earth, is to use the mobile phone network.)

(Another way to get you to the Moon is to use a laser powerful enough to point at the Moon and send a man along the laser beam to get to the Moon.) The Moon has a fixed position towards earth, that way you don't end up in a crater, or we don't pick you up on some rocks somewhere else. Where I land you, is where I can pick you up. (The transmutation systems will create a condition of detachment, and will allow our research teams to explore the limits of the knowledge of the Creation.)

I just took a sip of a drink. You as Knowledge Seekers heard the noise. You've been set to do this. Some of you, who came here to the Linz center, should be able to feel it. I'll do it again. Feel the sip, feel what the drink is? How it tastes? Try to feel the emotion that is created within me. The knowledge is transferred to you. As you are part of the structure of Universal Community through dimension of the fields of the universe.

Just listen, and try to see. We did a test with Rick a few weeks ago. This is part of the same test, but in a different dimension. Just listen. Don't think, feel it through the Soul. Write it down and I will come back to it later on.

(There is a difference between feeling and guessing. So write it down now. This will help you to gain confidence in your own emotion. Then later on you'll understand what was missing, and what you have to adjust.) (This will help you) connect to the Soul.

I open my soul to the whole dimension of the Creation. Now you try to see if you're connected to it.

(Mr. Keshe takes of sip of his drink >>>)

I'll give you a clue about the drink. It's a combination of the emotion of different nations, and different cultures. You've got to remember, I have traveled the span of the universe and this Earth, and I've chosen the best of the best, when it comes to purchase of life. The drink I drink, has to give me pleasure. It has to be something that allows me to transfer my emotion.

It's like when you're thirsty and that first drop of water touches your mouth, you get satisfied. Because before entering your mouth the water is in the matter state. The minute it enters your mouth, or your body, it (converts) into the Gans state. Then it's in the state

of the fields of the universe. This is why the field travels the whole cell structure of the body of the man. The body next to you does not feel your thirst. It's only you who feels it, and when you take that first sip, every cell is satisfied.

Last week I deliberately asked about the centrifuge, in a different way. How we work with, and how do we look at the centrifuge. Many scientists have not understood. Actually, I was referring to the centrifuge when I asked about the position of the Earth in respect to the Sun. There is no way, that the Earth is moving away from the center (of the Sun). If you understand the process of the Creation in a true way, then the knowledge indicates that, the Earth is moving towards the center (of the Sun.) Now, I explain to you why the scientists are 100% wrong.

Teaching on Vacuum and Centrifuge conditions - same

First of all, if you just look at the physical position of the Earth and the Sun, then yes, it could be moving away, or whatever. But there are two major factors, that tells you the Earth is really getting pulled into the Sun. The first factor is that the Earth is not stationary, it's dynamic, and it's at the end of "a string" and being rotated around the Sun. The Earth is in a centrifuge condition. In a centrifuge condition, the heaviest always goes furthest away from the center force, and the lightest comes closest to it.

(No scientist, nor any scientific structure has ever considere that the Earth is in a vacuum condition of the Solar System, and the Solar System itself is in, an even higher density (vacuum) strength of the galaxy, and (so on, to the U and Unicose etc.) The Earth is under two conditions, one a centrifuge condition, and the other, in (multiple vacuum conditions.)

What do we do in a vacuum? We get the same response, (or the same thing occurs, whether) it's in a centrifuge rotation or in a vacuum. (In the matter state of Earth the lightest gases goes further up in the atmosphere, For example, a balloon floats upwards away from the Earth. But in a vacuum condition, the heaviest gas goes upwards, and the lightest comes down towards the center.)

(The same applies with the Gans's, only in reverse.) Where the Gans's are an amalgamation of the fields forces. This is why you see separation when you put Gans's on top of each other. Have you ever bought those colored sands, that when you put one sand over the other, they separate. You can see which colored sand is where.

(The same thing happens in your body, where you have different Gans's together. When you put Gans's together, you create a vacuum condition that separates the field forces.)

In the plasmatic condition, the stronger fields are in the center, and the weaker ones are outside. (We call the outer fields magnetical (M). But what Knowledge Seekers have not understood, is that the gravitational (G) fields must be heavier, and stronger than the M, (so that it pulls everything into the center.))

(I think he is referring to what physics calls the gravity. However, the scientists have not been able to explain it fully. Maybe this is why, when you drop a very heavy stone, and the lightest twig, they both essentially fall at the same speed towards the Earth. Because detached from the Earth, they are both in the plasma state, and not effected the weight of matter, and therefore they are treated as equal plasmas. Essentially, they have no weight. Weight is a matter state condition in relation to the Inertia of the planet.)

This is how your Soul matures to reach the condition of separation from the physicality.

(What does this mean? There is a very big "gold nugget" of knowledge in this. Could it mean that when our Soul matures, then we are not bound only to the plasma of the Earth, but rather to the U, and if we mature more, then the Unicose, and finally the Creator? Pondering this brings a lot of joy and freedom.)

How do we understand all these dimensions?

(How do we make a distinction between one dimension and another, so that we can work with them separately?)

How do we separate the understanding of the centrifuge, working within what we call, the vacuum? And then on top of this, how do we understand the plasmatic field forces, that forces the condition, of the stronger fields to be in the center?

These are all dependent on the conditions of the manifestation. (All these conditions require the understanding of the interactions of the fields of the universe, (and how they work together).

Sometimes matter state in the vacuum condition takes the center place, "because we did it heights, the strength of the field of the Gans plasma." (unsure what this means?)

We see this in the bone structure of the man. The body of the man is a total vacuum, an absolute total vacuum. The vacuum inside the body is even higher than that of outer space. We tested this in Belgium, where we created different vacuum conditions of different strengths, and we observed how it operates. We created vacuum conditions up to about 14, which is beyond space level vacuum. Cosmic atmospheric (vacuum) is around 12.

It's strange that man has not understood the Totality. If we consider the laws of vacuum in the body, how come the bones are in the center. And you have every other Gans attached to it, your muscles, lips, skin, are all connected to it. It doesn't work, it doesn't come into understanding of the essence of Creation.

(The explanation for this is) that there is a vacuum condition inside another vacuum condition, which dictates, that the heaviest goes to the outside. What is this (secondary) vacuum condition? "This vacuum condition creates field forces, that changes into the "ray of light" condition, which is an amalgamation and transformation between one to the other."

This is why your bones are the shaped the way they are. They are spherical, in essence of the field, but cylindrical in essence of manifestation. Now, you understand why your bones have such a structure. Because you missed very important field forces, which sit within it, which is your bone marrow. Bone marrow creates this condition. Bone marrow creates a field rotation, and that is why your body can suck blood out of the inner ends of the cell, and the lymph comes in through it. (I think he is referring to the micro channels in the spongy bones that lymph is drawn through to create the immune system.)

Our scientists and men of medicine are ignorant of the Totality of the science of the Creation. This is why you have problems with the immune system. Because they have not understood, that you have a vacuum, within a vacuum, and you have a centrifuge system of the field forces, not in the matter state, which leads to the creation of the body of the man.

(This vacuum inside a vacuum is an important part of building the whole structure of the body of the man.) Why do you have a calcium in every cell of the body? And what does the rotation of the Fe in the blood bring you? This is a centrifuge system with a solid base.

(You have bone marrow creating high field levels in the center of the bone structure, which becomes the centrifuge (?? ?? body weight). In the matter state it becomes a pinpoint of holding on to the next vacuum condition, which is the muscle tissue, on the skin of the man. Then you understand how life is created.)

We have to understand this. Otherwise we cannot create life in other dimensions. (If we cannot go through the transmutation at the field level), then in another dimension, you (might manifest) your brain and skull as solid calcium, and your foot. Because you made a slight error in understanding the process of the Creation.

(The EU will help us to understand the true process of Creation, (to overcome all the misunderstood things going on today in science, and especially in health.)

(After using the Gans's on people who have been paralyzed, they begin to move within hours and days, and the pain goes away. This is because you transform the matter state fields. (You are converting your emotion to the dimension of the fields of the universe), within the universe of your body.)

(Almost all of Man's problems are because he lacks the understanding of the process of Creation). Even the most intelligent scientists on this planet, are narrow minded, and (trapped in) the knowledge they've been educated with. And if they do get a little bit more understanding, then they become arrogant, and are not able to understand the rest of it.

When you become Knowledge Seekers, you have to understand the Totality of the process of the plasma, from Physics to Chemistry and Biology, and then the essence of

the emotion, and then the essence of the Soul, which is the plasma of itself, before it again becomes (another) cycle of the matter state.

(If you push something to its extreme), then you come back to the same. How much you have not understood. If you increase the alkalinity so high, it will become acidic. If you give enough, you will become a taker. If you create such a huge potential, you (go) from voltage to current. This is what no man has understood.

In the next process of regeneration of the teachings of the Space Technology, you will understand the emotion of the cycle of the life. You won't say, "Darling, I feel what you're going through." (Because for sure, you will feel exactly what he or she is going through, because you lock into the emotion of the Soul. You will no longer say, "Darling, you don't understand my pain." (Because you will have connected yourself to his or her field of strength, but not doing it as a barrier of the field strength between you and your partner.)

Then mankind becomes knowledgeable to the essence of Creation, in the essence of interacting with the Universal Community, not in the dimension of matter state, but in the dimension of the field strength. It will become interesting for us, because we tried this with you before, and some of you tried it on your own, but you were not able to get it to work. Because you never understood the whole essence of it.

Some of the Knowledge Seekers before they came for the first trials in Linz, called their cousins, or friends and said, "I'm going into the EU, I will come and see you." But it never happened. What's the reason, since your cousins or friends were waiting for you to arrive. It was because the soul of the cousin said, "no, no I don't want to do it. You want it, but I don't. Because I know what it's going to create for me, and it's not the time for it."

When both souls sincerely want to do it, then they will achieve it. We saw that last week with the 2 couples who came here. Both Souls wanted and both Souls achieved. (We tested this by physically separating the couples in the system, because then they had to come from different positions. And they still achieved, because they felt the same.)

In the past 6 to 8 weeks, we have tested every possible combination of understanding the movement of the STM. (One of the KS felt the pain of another person in her dream. The pain was felt because of the closeness of the souls.)

Now, we'll go back to the experiment we did earlier to see if you could feel with your soul the drink I took. Check what you wrote down on your paper. What did I drink? What combination, and what pleasure did it give me (from the memory of it). Then we'll see how (far you have come in understanding the work of your Soul, and how you are able to work with it.)

Those of you who have been around me know, that I love green tea, especially in the morning. This comes from my travels in China, and understanding the essence and the beauty of the nation, and why they drink it.

(Green tea is made by burning the leaves and making the first layers into Nano material. Therefore, green tea is actually a Gans, which gives you a lot of energy for a period of time. That's why a lot of Chinese are very slim, because they take this energy, (as the first tea of the day. They quickly fry and burn the black tea leaves and that keeps the green color.) As a scientist, green tea gives me a lot of pleasure to drink, because it carry the emotion of the nation and the culture within it. It has a lot of meaning for me.

The other thing you heard was (the feeling of) a pure water, which the tea was made of. I drink it very hot, in a special way that I enjoy, and that it carries the energy. The other part comes from my background as an Iranian, which I like "sharbat", which is concentrated sugar, melted, and let to cool down, and then it's stuck to wood, or a string.

It's the pleasure to have, because it's a rapid dissolved energy, especially when I have to teach. Teaching requires a lot of energy. Those of you who have been around me know, that after 3 or 4 hours teaching (the KSW), I am so exhausted, that I literally need a whole afternoon, or maybe next day, to recuperate.

Finally, with the tea comes the essence of the smell and taste of saffron. This gives me an emotional elevation. Saffron to me has a lot of meaning, it's the essence of love and creation. When you take a sip, it revives the whole of the body of the man.

How many of you got all of it right? And how many of you got only one part of it right? How much was from the knowledge of knowing, and how much from the knowledge of the emotion? It's the beauty and taste of the green tea, the odor of the saffron, with the sweetness of the sugar, and (taken) as a human, which is the essence of his creation, with the water of life. And all of it at a very high temperature.

What is the emotion created within me, which satisfies my inner being, and my dimension of understanding the Totality. (Through satisfying the emotion,) we will bring together the different cultures, under different banners and emotions, from different parts of the universe.

Now that we have become travelers of the universe, would you introduce tea to a man from Planet Zeus? (The one who introduced green tea to me, gave me a lot of pleasure. How would you explain it, so that they feel the essence of the emotion, and then they feel it in physicality. Would they feel your emotion, of what you give. Would your emotion be love, or would it be tainted with desire.)

(In the coming life of man, we will know how, where, and the way we are connected to each other. As I said many times, adultery will become impossible in the dimension of the Universal Community. Because they have the emotion of commitment and connection, and they become soul mates for the life of the Soul. Separation becomes possible only if both Souls have agreed to separate. You cannot separate if only one Soul wants to. It's the emotion of the Soul that creates a separation.)

The life within dimension of the universe becomes as true and clear, as what I call, the light of the Sun, transparent and complete. It becomes life without pain. Man from now on enters a new dimension of understanding of (his own creation and how he was created. The Totality is created out of it.)

Once the man knows that he can create children through the essence of the Soul, would we have children with physical handicaps anymore? Would these children created out of the Soul, be the light of the true reflection of the Light of the Creator, as they are created in the essence of the Soul of the Creator, and not the physicality of the being, with all its faults and Soul dimensions.

Now you understand, that the Children of Mitra, in the essence of understanding will be pure, even though they live in a different dimension of physicality. The dimension of the physicality of the Man is from this planet, while the dimension of the physicality of the children of Mitra, is from the Universe. Wherever they go, they fit into the society, because they came from the best lights of that society, and not those which are tainted.

Mitra brought the best lights from every field in the Universe, to create his own, her own children, that they will be the essence of perfection. That child is amongst us. We have to understand and treasure it. Mitra's Child is not (the same as) the first child of Adam on this planet. Mitra's Child is the first child of the whole Universe to start the new Creation, the new dimension of life. It's for the whole of the Universal Community, as a total, as a Unicose.

The new cycle has a dimension of physicality, which is the point, or the place (it begins.) In essence, the Soul of the Creator is within it. Mankind will come to understand this, as Mankind has no choice. (The Universal Community will make him to understand.)

Now, you try to understand. (If you can go through the emotion of knowing what I drank), you'll get the same emotion as me.

Did you smell it? Did you feel it? Did you feel the essence of my soul wanting to share it with all of you, and not to keep the beauty and the taste it carries only for myself. Did you take a sip from the Cup of Life of the Creator? Then you understand the Totality of the process of the Creator.

Did it enlighten the Soul, or did it freshen the physicality? Mankind will break through in the new understanding, that while the physical dimension of life has meaning, it does not have the importance. It does not have the priority. (Detachment does not mean, that I don't want to be here). Rather it means, I want to be here, because I want to enjoy the Totality of (life). Not to be a part time lover.

Later on today we'll introduce the changes that are come. We'll come to understand the Totality and create that understanding from the dimension of the STM.

We have to understand the totality of physicality, and the totality of all dimensions, physical, emotional, transmutation, transformation, transferring from physical to what we call, transmutation and transfer, and vice versa.

How much can we change?

How much can we push to understand our own limitation. Humanity needs understanding of the Totality to be able to become the "Man of Universe," and this knowledge does not come freely, in how we transfer these energies across from each other.

How do we comprehend the emotion of it?

Do we need to think to do, or will (action) come to us naturally?

How natural does it come to us?

Then, would we always live in the dimension of the Soul?

Or would we live in dimension of physicality (P), or would we come to understand the border line, and which one is the Soul, and which the P?

Then comes the big question for mankind about those who we accuse of being schizophrenic and having multi-personalities. How would they (bring out their personalities into the physical dimension How would they share the singularity of the physicality? Or do we create another dimension of the problem, (by us not understanding ourselves, how they function?)

(How would we react) if we have a schizophrenic in one system, and they want to appear in the other system? (Which Souls will manifest in the other system? Or would two or three personalities manifest, and would one manifest as a man, another as a woman, and yet another as whatever they want to be.) Then if we called in their creator, the parents, would they have the comprehension of understanding?

These are all real situations and possible problems that will open up from next week onwards, by running the transmutation tests.

Where do we centrifuge your fields, and (will the fields of one system match that of the other one, so that you come out as a man in the other system. We can create the field strength conditions of the Moon or another dimension in the other system, which will show us how you will appear on the Moon. (We would set the system at the field strength of the Man.) But how would you appear? Would you have 10 legs and 20 arms, because that's what you need on the surface of the Moon?)

If you go back to all the teachings we always said, we will do test trials before you go to a destination to see how you will appear at that place. Now we have come to it. Our scientists can create the conditions of the Moon to see how you will look. The systems have been made, (they are just in bits to be put together.)

(When we transmute you from one system to the other, will we get perfection in both systems, that both system mimic the conditions of earth. We foresaw such a situation in our designs.) (That's why last time we put the people who still want to be connected to

Earth in the center of the systems. That's if the system we put them in doesn't match how they want to be manifested as. (??) It will be very interesting to see how you understand the transmutation process. In one condition people will be manifested in the room, but would you still see your other half, in image?)

It will be very much like when you dream. You see yourself in your dream, in the mirror, "and you see yourself back." I went shopping and I bought such and such a dress, because (I saw myself wearing it) in a dream. In the condition of the Soul, you still see your dimension of physicality, because that's what it fits it. Now you understand, the Totality of the knowledge of space technology is absolutely mind blowing. But once you understand it, (it will be the next stage in your development.) (This paragraph was a little hard to understand. Does he mean that, like in your dream, your Soul shows you the best way to manifest yourself, that it fits the conditions of your existence. But then physicality has to accept it.)

(One of the dilemmas that you will face in the coming time is that you can be with two Souls, sitting, knowing, and understanding each other, but not seeing each other.) (It's like when sit between two friends and you communicate without speaking, you feel each others emotions.) (This can be a headache for some people who only like to think and speak in a physical way. But what's the use of thinking when the other already knows through feeling.)

Then, does the man need the emotion of the language and the voice? Interesting times are ahead of us. In so many ways, the perfection of understanding the Totality is upon us. We have no choice.

(It's time for us to understand that, now we can perfect our lives with the new dimension. But how do we assess it and collaborate with it, to make it a part of us? How far can we push ourselves to understand, and (bring the "manifestation of the Creation.")

To what extent will mankind understand the teaching of today and make it the beginning of the evolution, and the new way of living?

Everyone who comes in from next week for the transmutation will have to sign a disclaimer, that you come freely and willingly, and in according with your will. It has to be notarized. Don't come in if you don't have the letter with you. Then you will give us the right to relocate you through the process of transmutation and transportation. You have to make up the disclaimer yourselves, we won't do it. You will not go in the System if you don't have the notarized and registered letter, that you want to be a test pilots in this series of what we call, "evaluation and development of the new technology. It has to be with your free consent.

We as One Nation come to change the operation of "man's nation" on this planet. In a very short time, KF will announce the establishment of a "One Nation" organization. (It will be run by KS and will supply all the needs of the man including food, energy, and everything else we need to live a comfortable life.) We see crisis around the world and

especially in the West with food, and the rest of it, that has been created deliberately, or whatever.)

The KF has set up the One Nation, One Planet, and One Race and will respond accordingly to this situation. We are just waiting to see how it will take shape, and what is the best time for us to intervene. When your nations cannot supply you with food, there has to be an alternative. That alternative is what we call, "Totality of One Nation."

(We'll open a new dimension in the patents. You have the patents, but you do not understand them. Now we'll release new technologies that everybody can use immediately. We'll take the pressure off the life when it comes to hunger, heat, and the rest of it, especially for the Europeans and the Western world.)

(It's different for the Africans), as they are well looked after. It does not matter how much the price of the oil goes up and down, or if there isn't any gas or a car to drive, as they live in the jungles. And the monkeys don't care, (as long as) they are loved by the man, or are fed by the man, because they can feed themselves the same as the man in the jungle. Now you understand that the Totality of the knowledge and independence of physicality, has made it a pleasure to live in Africa, because you're already independent.

Let's see what comes up. In the coming weeks, let's see how fast we can create the dimension of transmutation and transfer, and a dimension of further understanding, so that by October or November we can bring you to Austria, and then ship you back home.

As I said to one of our KS couples, leave the phone at home, and both of you come in the car, then I'll send one of you back home a different way (via the phone). In this way, we'll see the difference between physical travel, and transmutation. Would the partner find the other one at home when he or she arrives? Was the desire to go home? (Is the love so strong, that it can bring the other one home? (We tested this two weeks ago with a couple, they both shared the same desire to go home and experience the love.) Now you understand why we run these trials, so that upon completion, every Soul gets what it wants and needs.

I hope you understood more about what is to come, and I hope you understand the new knowledge (we shared with you,) which is far beyond the understanding of the present time. This new knowledge is like the first time we introduced the Gans's to you as a different kind of energy.

Now we introduce you to a new way of living life in the Universe, and Man has no choice but to learn it. You can deny it, but you can't run away from it, because this time, you can't hide in the jungles of Africa, or behind locked doors and say, "it's got nothing to do with me." It touches your Soul, and it has everything to do with you, it doesn't matter where you are.

End of Part 1 Quick Index 449 KSW

KF is selling a painting by a KS who works closely with KF, for 3,000 Euros. The painting is also an experiment with Gans's and how it effects your emotions. The colors in the painting will change according to your emotions. It's not just that you buy a painting, but you become part of the plasma research, and you are asked to record the changes, you and the environment go through. Put the 2 paintings across from each other in the room, and go in-between and feel the fields. Mr. Keshe will personally sign the paintings. The paintings will be valued at hundreds of thousands in a short time.

European governments are putting forward some aid packages to assist families with the upcoming crisis, but it won't be enough. KF is moving ahead quickly to release the Gas and Plasma Energy units for production, which will rapidly be made available to governments. So that Europe doesn't need to go through the recession, which is expected.

We provide the technology and knowledge to create the backing to the nations, to start the beginning of the process of "One Nation, One Planet, One Race," to replace the United Nations as One Nation, as the nations will already united in knowledge and technology.

We decide as Knowledge Seekers of "One Nation," how our language nations will operate. We start the establishment of a "One Nation policy" through introduction of the technology, and to be available to every man at the point of need. They give you 500 Euro to be happy for a while, we give you the whole knowledge, the system and technology to be happy for a life time. Then you do not need to depend on the Saudis, and the rest, and the danger of nuclear attack by one or the other. Because the change has come, and we bring force and the enforcement of knowledge.

With the introduction of the new technology you as citizens decide (how it will be implemented.) We opened the patents to you, which you read, but you never understood. Now you will read them and understand, and the new cycle will start. Because at this moment in time there is a need for the T, at the same time "One Nation policy" will come into operation.

Q: What does the STM look like in the eyes of the Universal Community, a light?

K- How do you see the Sun and other stars? How do you see Mars? How come the Sun is a light to you, but the planets are seen as a matter state? Have you ever thought about it? You'll find answer to your question there.

Conditions of the field balance and field conditions, dictates the understanding, observation, and the emotion. Think of it in an easier way. Tea remains in the matter state of a liquid, (until it enters the mouth), then it becomes an emotion. It still has the dimension of physicality, which we like to feel, as we consume it. It's the same (with the other) conditions. (Whatever I decide to feel, (I) can feel.)

A lot of people say to me, when you can see all these things going on, why do you let it happen? Because it has to happen, it has a reason, it has a cycle.

When I was in China, I had a couple of very strange meetings with a Chinese couple. (I really didn't need translation because I could see, feel and understand what was going on. I could feel the language of the two across the table, and understand the emotion involved in the meeting. They were talking physically, but also communicating in the Soul dimension.)

When I got up for a break turned my back to them, the conversation changed. I could hear and feel the emotion of the change, the way they were talking to each other. Even how they were looking at each other, I could feel (what) they were communicating to each other. It was a beautiful meeting. In the second meeting I conveyed the message through the Soul to them, (and they seemed to understand because the meeting was very different. The emotional interaction was different.)

At that time I said to myself, when will the Man understand, that I see everything, but I close my eyes to it. I don't need to be told. It's the choice I have. (But I accepted to live) in the man's way, to understand the man's way of living and doing. It's not my ignorance or my, what you call, "being simple." It's just understanding (how) you live in the man's world. Man made the cars, and everything else. It's a man's world, and man has made this world for himself in his physicality, and we have to respect it.

But it does not mean you have to go (along) with it, and do (all the bad things man does.) Many times Knowledge Seekers who are very close to me always say, "Mr. Keshe, you see everything, why don't you do (something about) it? Why do you go through all this pain?" I always say, "I have to learn something from it. That's why we came here." But we see everything, the desires, lies, cheats, and everything else. Nothing is hidden. If you choose to go through the path of the Soul, and then you live that Soul life.

Once somebody said to me, the worst thing with you is, when you withdraw your love, it hurts more than actually knowing, that the love isn't there anymore. Because when we enter a commitment (for) life, we commit with the full life and emotion of the Soul and nothing else. With a full love. Because we understand, then the Soul understands. But when it's broken, we move away not to take the pain.

As Knowledge Seekers more and more, you will understand this. (You will learn and learn to distinguish whether, what you see, is in the light, or in the dimension of physicality? How do I handle the Soul, and how do I handle the physical side. With this knowledge, now we are responsible for both. Up to now we had only been responsible to feed the Physicality.

(We gave the responsibility for the Soul to somebody else, like the priests, and they taught us about heaven and hell, and they called the Soul, God. Now we ourselves accept responsibility for both the Soul and P. We take the path of the life of Mitra, where we think good, speak good, and act good. Because when you do wrong, you do wrong to yourself, and you receive everything else that comes along with it. Your action has to be perfect, because you do it to yourself. Psychosomatic means you make your own illnesses

or disharmonies out of your thinking, feeling, and acting.) Man has not yet understood this.

A KS said to Mr. Keshe that we know what you are doing because of the background noises we hear in the recording. Now, if you can extend that, to the knowledge of the Soul, then you don't need to hear the background noises, because you touch the Soul. (You will also be able to feel the emotion of the sound the dog makes), when it's made, or what is happening when you hear other noises. It's interesting how fast the Knowledge Seekers will become mature to this, now that the new technology is being opened up.

Because of its Nano structure, green tea has a connection to the Soul, When you put your Nano materials in a given salt level it changes to a Gans. (All of our waters have some salt in them). Green tea is made in a way that it is what you call, Nano plated first. (The leaves are fried fresh, just after picking, this creates different emotions, which becomes available to you).

If Man, and the Chinese understand how to use the green tea, a lot of diseases will not exist. This is one of the reasons Chinese live a long life. However, when you make a green tea and throw the first water away, you have lost the process of the energy, of feeding the Soul.

If you leave the leftover green tea in the teapot, it becomes black tea, because the energy of the Nano particles is given to the environment. Green tea is actually a black tea roasted. The roasting part makes the Nano coating. Traditionally, they roast the tea leaves the same night as they pick them. This way it stays fresh, and gives it the green color.

For the notarized consent, you give your full consent, freely and without force, to the KF and its operations and subsidiaries, for your body and soul to be used for testing, evaluation, and elevating the knowledge of the man. I give all rights to the Keshe Foundation to do (what they need to do) during the time of testing, and I have no claims whatsoever.

KF is still looking for people to be "Satellite Souls" from around the world. We need more people to do this. KF is planning next Wednesday to start the transmutation tests.

First our aim is to transmute one Soul, from one EU to the other, not the P, only the Soul. We'll do that for a few days and see how it turns out. Then most probably we'll send the Soul of the Physicality (STP) across after that. Then we'll attempt the full transmutation of the P.

Our team is building the first two Vertical Systems for transmutation. If you remember some time ago we introduced the Vertical Units. Now these are getting fitted to be a transmutation and transportation system.

Who will be allowed or not allowed to transmute? What Soul allows you to go? If you're coming in to the system to escape, forget about it, it will not happen. If you come here to

collaborate, to bring and share knowledge, you will find you'll be transmuted. You've got to understand you cannot cheat the system, because the system is you. You're the captain. We only provide the facilities, and in a way the runway, it's you who has to fly. You'll have to decide under what conditions you really want to fly. And how far you want to push this, what we call, transmutation and the transportation.

There is a long talk by Azar. First she said, she learned that coffee, tea, onion, garlic and hot pepper engages your Soul more. Mr. Keshe did not answer. In summary, she continued on, all these years you brought us a lot of knowledge to free ourselves and humanity from the shackles of P and this planet. But at the end of it, you left it up to us to decide. In every teaching you constantly bring the same thing, but in maybe a million different ways. But ultimately, it's the humanity's decision to go with the new technology. You cannot force us. The action has to come from us.

It seems that during all these years of teaching, nothing appears to be "clicking" for a lot of people. So, is it also possible that in the end we bring our own demise? And for you, it's a very painful journey, because every single day you keep doing the same thing over, and over again, and hoping that we'll get it. Are we getting it?

K- Azar, I want to explain to you something, how we get it and what we decide, with everything we go through. The experience of life is a very good thing to go to evaluate.

In answer to her question Mr. Keshe told a story about his life during his college days in London. I'll just summarize briefly. During those years he got the idea that he wanted to live in the center of London, rather than on the outskirts. He found a loft, which is room on the top floor under the roof, where you see the rafters and big windows. We would consider that a kind of artist flat. Everyday he had to walk up 5 flights of stairs to get to the top, and along the way, each floor had 2 doors he had to pass. It sounds as though the area he lived was probably a poor area, there were no lights on the building and only Iranian refugees from the Revolution were living there.

After working hungry all day, and before he left college to return home, he would think about what he would cook for dinner, but as he was climbing the stairs and passing all floors with Iranian cooking going on inside, he would change his mind, about what he wanted to cook. Because he is also Iranian, he has emotional associations with the different Iranian dishes that were being cooked, and this went on inside him as he was climbing the stairs, and taking in all the different emotions through the smells. When he reached home there was a lot of confusion about what to cook, and it didn't turn out the way he planned it, because more emotions got inside.

So he said, "this is what emotion is." How can we stick to it, evaluate it, and understand it. (Each culture and language has a different emotion associated with it. An Englishman coming up the stairs would never react that way. To him it would just be some cooking smells.)

(Universal Council members have to understand this about language and emotion. These emotions all come into play if you want to understand the work of human race. We have to try to understand the desires, the change of emotion in interaction with other emotions, the understanding of it, and being able to accept the pains of it as you go through the process of understanding it.)

This brings a lot of solitude, it brings a lot of comprehension of the Totality. How we see it, how we accept it, and how far are we going to sacrifice to understand it? Does that sacrifice bring us any gain?

For example, if we fall in love with a partner from a totally different culture, different language, and different (ways of understanding life.) (And we give everything to try and satisfy that love, or what we call, "love." Then in the end it doesn't work out. (The deeper love wasn't there, you didn't understand it, or you misunderstood it. The love was never there.) (If you don't speak the language of your lover, then you don't understand the nuances of the language, or the unspoken language, where the emotion is being expressed.)

(Mr. Keshe says he understands the emotion of the English language because he moved to England at a young age. He understands English more than Farsi. The time of youth, is the time when you understand emotions. (This is different than speaking "dictionary English," where you end up making a lot of mistakes and misunderstandings.) Dictionaries do not tell you the emotions of the words.

We don't have this problem with the Soul. The Soul says exactly what it means. It implies and applies exactly what it (wants to say.) This brings a lot of pain, a lot of understanding, and a lot of comprehension of Totality of the essence of a race. How much you are going to accept.

In Iranian culture there is something called, "Tarof." In Iran this word means, that sometimes you say something, but you don't really mean it, you actually mean the opposite. It seems that they don't want to disappoint the person, so they tell them something positive. For example, someone might say to come over to their house, but really they don't want you to come over. Through the culture and the emotion you are supposed to be able to tell, if they really want you to come over or not.

A KS once told Mr. Keshe that, when she goes to such a place, she doesn't feel good. He told her to use a combination of CO₂, Zn Gans, and something else, and then go back into that same place and see how she feels. Later on she said, never ask me to do that again, because I found out that 80% of the wrong things I see with the others, were actually with me.

(A lady went into the EU with breast cancer on the left side. Left sided breast cancer means issues with mother or daughter. She said that when she was in the System she sorted out the problem with the Souls of the mother and grandmother, (which they didn't

do in physicality.) He said to her, that maybe she changed the condition of her cancer.) We bring that change through emotion to the dimension of physicality.

(It's important that we understand what causes the cancer. It's not only the interaction of other people with our emotions, but the bigger problem is the interaction of ourselves with our emotions. From now on Man will solve these problems.)

Death through cancer, and other self-inflicted emotional psychosomatic conditions will become a thing of the past for man. (In a way, unknowingly ending our physicality through our emotions, will stop.) The new understanding will give a new dimension and extension to the physical life of the man. Because we will handle these emotions at the beginning, when they start, and not at the end, when the cancer is already there. The cancer also brings with it a lot of other things.

In the EU trials of the past few weeks, we have seen the effects of the expansion of the Soul and how it changes the physicality. (A man with Parkinson, who could only write one word, went into the system for a flight test. When he came out he was able to write 5 sentences without stopping. He hasn't done that for 10 years. If you say this to anyone, they will say, "that's impossible.")

But in fact, it's the Soul that does the job. It's the expansion of the Soul to get ready to fly, that balances a lot of things, and the physicality is accepted. The Soul can fix the physicality, which He Himself created. Whereas medicine cannot.

Q: Does Mr. Keshe know if we have the right Soul for doing the transmutation? Or can it be that he says, "no, you're not right for it."

K- I have no right to decide, your Soul decides.

A 1.6 billion cruise ship is available, because the company has gone bankrupt. Mr. Keshe had the idea, if someone were to purchase it, it could become the center of the world's government (One Nation). A ship with everything, an independent nation, that we can float to any nation. It's a very intriguing thought.

Where is this new Prime Minister of England going find 130 billion to support the present economical situation of his nation with energy and food? The population of England is 70 to 75 million. That's about 2,000 Euro per family budget. Where is this money is going to come from? Then you understand how much governments have stashed away, or if they haven't stashed away, where are they going to take it from? You.

Money has no value a few meters about the Earth. So what are we fighting for?

Q: When Mr. Keshe says, "with the emotion of the Soul, you transmute to any position in the Universe." I wonder what this emotion of the Soul is? What it is like, and in which condition we will reach it? What do we really need to achieve this condition and elevation?

K- What about if you say, or if you understand that you already have it? You denied it. You don't need to reach it. It's already part of you, it's already in you, it's already born with you, and you are, because of it. That's all it is. That's all it needs to be. That's all it is, That's all it has to be.
That's all you need to understand.

R: Is our attachment to the physicality what prevents us from feeling that emotion normally?

K- What do you mean by that?

R: Well, you say that this emotion of the Soul is present, but we don't recognize it, or we don't pay attention to it. Perhaps because our attention is busy with our attachments of the physicality. We have periodic times throughout the day that this emotion is available. If we don't allow our physicality to just smash everything together as the dullness of ordinary life.

K- We prioritize. We give (more) priority to our physical dimension, than to our Soul dimension. We do that from the very beginning, the point of birth. If you're taught from the establishment of the fetus, that you have the option to live both ways, how would it be?

We are aware of the Soul when we are in the womb of the mother. But we are not aware of it when it comes to being in physicality. Children hear the parents during their time in the womb of the mother. The child's Soul feels the Soul of the parents.

In extreme cases, we see psychosomatic damages just prior to, or immediately after the birth, which means that the Soul has already gone through the phase of pain, or whatever, and it has already gone through psychosomatic changes.

(We see this with) children with skin, digestion, and breathing disorders at the point of birth. Look at what caused it. How much did the husband and wife battle with each other. How much battle was there in the environment of the mother, in different shapes or forms. Not necessarily shouting, and hollering, but emotional and the rest of it. You can sort this out right away, if you know the cause. You don't do it by ointments and creams or whatever, you do it by elevating the Soul of the child, the infant.

If a child is created in the dimension of the Soul, you will not see very much illness, or whatever, because it fits itself (into its environment). (We see children of good character in families where there is true love and care from both parents. And quite a different character where there is a lot of fighting in the house, about who's the boss, and everything else. It's not necessarily shouting. In these cases the child is always sick, and sick right through the life, because the Soul is touched, and it felt it.)

Parents don't understand this. A life which is full of adultery, and everything else, and which is supposed to be perfect, (but it is not), gives these kind of conditions. Adultery doesn't mean only sexually, it can be by thoughts, like, "oh, he likes this - therefore, I'll

do something else." Or I'll do something because he doesn't like it, but I like it, and things like this.

It's very intriguing to understand the process of birth. Why do you see beautiful children, from beautiful parents? Is it the genes? And why do you see some of the worst undesirable children from beautiful parents? A man who is happy with a beautiful woman, or a woman happy with a handsome man, and they feel proud to be together, that happiness and joy, creates happiness in the fetus. It's a combination of the two.

It doesn't mean that other people can't have beautiful children. (When you see a bright Soul, it could be from any color or race. A bright Soul doesn't need to be a pretty child). Handsomeness, prettiness, beautifulness, all that comes out of the conduct in the physical life. It's not the beauty of the face. "This beauty is a skin deep." This is what mankind has to understand.

We will learn a lot with the new understanding of the cycle of life. Not to be cruel, but if you understand it fully, (you can understand the true essence of "one child" policy of China.) If you understand it at the level of the Soul. It's more than enough to have one child, (if you keep that one life, one soul to the point of its maturity, to the point of perfection. It's like an army, to look after that one Soul to perfection.) One day, man will understand it. You don't have time for more children.

But nowadays we (only try to give our children the best cloth, or the best things in life. But we don't nourish their Soul, so that the best will come for their existence. Very soon man will change.)

A KS was pondering the teachings of Mr. Keshe and came up with the following long question.

Q: Mr. Keshe, I was watching the 380th KSW, where you show a position below the Uvula, and explained that the higher force field of the air is transferred to the STM. Then you explained that the STM plans the positioning of the mouth and nose for its own use. Further on you said, that if we create a condition below the Uvula, we can expand the Soul beyond the physicality.

Then I moved to 125th KSW, where you explained the interaction of two reactors with two nucleus, and then you told us to go to the first few pages of Book 1. With that understanding, I read pages 14 to 16 where you talked about reactor technology, fission and fusion by Plasma Dilution. There was something about plasma dilution and (breaking of) the Coulomb Barrier.

Then I continued watching the 125th KSW, where you talked with Douglas from USA about making a reactor with 2 nuclei, in which he had copper oxide in the center with water plasma CO₂, plus a drop of his blood, and in the outer ball CH₃ with liquid, to elevate the pH. He saw the plasma light when he rotated the balls, and his wife saw him moving in slow motion.

The question is, at that point where there is a connection between the CH₃ carbons of the outer ball, and the CO₂ carbon in the center, and since Hydrogen is lighter than Oxygen, does it expand the fields? Was this the result of the Plasma dilution, and the breaking of the Coulomb Barrier as you talk about in the book?

K- The breaking of the Coulomb Barrier creates and releases energy, and that energy is what we see as light.

The energy within the body of the man is equal to 18 Hiroshima nuclear bombs. If you calculate roughly how many cells are in the body of the man, and how much energy was released by the bomb, then you can find out how much energy each cell has. (Then the energy of each atom, that went together to make that cell.)

But it's not just the energy release, which creates the light, it's the speed with which you release that energy to another environment. The friction of the energy release creates the light. This is the part, that a lot of Knowledge Seekers again, don't understand.

When you explode a nuclear bomb, there's no harm done, (by itself) it's just a massive energy release. That is, until it hits your body. Then that energy (will have an effect on you). How much it enlightens you. How much it will move the cells within your body, and how many other things can happen with it.

So, it's not how you connected the carbon, and what was the energy. It's how you manage to release the energy and at what speed, that counts. So, we see this as part of the work. How we create that speed of release, and sometimes you can do it by stripping, sometimes you can bring it about by collusion, and sometimes you can bring it about by all sorts of movement. (It depends) how we understand it.

You might not see the light as a visual light. You might see it at the Soul level, because that light still comes from interaction of the fields. The Coulomb Barrier is another skin on the structure of the onion, still there is more inside it as you peel, one shell after the other, and the next, and the next.

Try to understand about the collection of fields and what their interactions create, and how much you can add on, and what you can strip, and what it releases. This is the part of the work, which we are busy trying to understand. It will create a lot of mayhem for a lot of Knowledge Seekers.

Q: What about physical problems related to the Soul. I know a person who is born with eye problems related to the nervous system in the eye. This person is a complete adult, very gentle, extraordinary memory, but has very little capacity with his eyes. He got a post-doctorate in abstract mathematics, and he remembers everything he reads. He is very human, but outside the standard norm, and he is a kind person.

First of all, what does his condition have to do with the Soul of the parents, or the environment of his birth, or doesn't it have anything to do with that? And it was just an

accident? (Did this Soul want to show that even with eye problems he can do something more with his mind, Soul, or brain. Is there any future betterment for these people, when they get older?

K- It's a combination of everything. Let me explain deeper, because this is something we have to understand. Some people might say it's cruel, but it's the reality of it. It's a combination of everything you said, plus the interaction the fields of the Souls in the dimension of physicality, of their forefathers.

The way we look at the eyes of a child, and say, (he's got his grandmother's eyes, or the hair of the mother.) So, it is a collection. This is why Bahauulla said, pray for your children 20 years before they are born, before they are conceived. (But Middle eastern culture children used to get married at age 10 or 11). It means that the grandparents have to pray for the grandchildren to be born, not alone the parents.

Go back to understand the true life of Mitra.

(When the grand parents think, speak, or act good, their children learn from them how to make perfect children. (?? The great grandchild can still be perfect, but it has to interact with the conditions of the environment. If you create a perfect Soul, it can still use whatever imperfections, to become a source of elevation for others.) We are here to serve, and not to be served, at every level.

(In society people commonly say, you inherited the eyes of your grandmother, but you also inherited her sins, and the beautiful work she did. It's not exclusivity, rather it includes all of it.)

This is why when an entire race all work the same way, they all think, speak, and act good, then the whole society becomes correct. (Then what do you expect, if they go the opposite way?) The biggest problem is, we need to understand the Totality, not just individuality, but all positions and phases.

Q: Well, I think that both sides of his family, are from military families.

K- (So what did they do, who did they kill, or supported? It's not just what they did, or what job your ancestors had, it depends on the effects, on the outcome of what they did, and the Souls they touched.

Sometime ago I was talking to a very influential world leader, and his words and understanding touched me. As the head of the state, he is given the last say, of whether or not to execute someone. (He didn't want to carry that burden so he setup a group to decide if there was a mistake in the judgment. The reason for this was because he didn't want to bring the problem of killing someone innocent into his bloodline. It shows how far ahead this man was thinking, that his action will effect his future generations. This is how we should live. Then we'll understand how much power our actions have and how they effect not only our bloodline, but the whole race.)

I will just summarize briefly about the 18 minute video by Joel from France shown about his vineyard trials run over 2 years. He started 2 years ago using Gans's put in rings, and some spheres in just one plot of his land. As it became successful he expanded to the whole vineyard. He used Gans's in rings, but not the Amino Acid, and not in a Star Formation, rather he based his design on the exchange of fields between the Gans's, the stronger feeding the weaker.

The results were fantastic and included a 150% increase in harvest, beautiful and vibrant grapes, he didn't have to spend the normal 80,000 Euros on chemicals for the vineyard and he had no problem with disease, whereas his neighbors have severe problems. Also when a frost came in January his grapes were not damaged. There are a lot of interesting things to watch in this video. Also the grapes were sold to the label called, "Chateau (??) Libby."

As this T is being researched and discovered we explain and share it with you right away. No knowledge or T has ever been shared like this before.

Hopefully we'll see you next week.

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:11).

K- Yes, good morning, good day to as usual, wherever whenever you listen to this series of Knowledge Seekers up to Keshe Foundation. We welcome back. And hopefully we'll learn a little bit more as usual, from each other and together. Today, (:12). we are going to go in a deeper understanding of transformation and transmutation. How do we transfer and how we transmute. This is, in a way, important to understand, as next week, we start the transmutation systems. Hopefully our team will put the last pieces together, which is getting done, all the cabling is done, it's just control panel to be added.

Then we attempt, we attempt to move man, with the new understanding of the world of Creation. Would we succeed, and how much we'll succeed, I'm sure will depend a lot on our understanding of Totality, and how we set our systems, and how willing the passengers are. People might come in with the willingness, that they want to be the first people to be tested for transportation from one system to another. But the soul says, "no, no," whatever you do, I'm not moving. Because I'm not ready. Because you are not ready, because whatever reason.

So, we will look into the Totality of the structure. We have set out to break new grounds and as usual, everything is much, has been step by step development. For all of us, we started about four months, three months ago with the first systems, with the first chairs and then we went from one chair to another, to see if the system is correct, and we amalgamated the, connected the whole three together, to understanding of. Then we started the new system with the expansion of the Soul, and expansion of the Soul of the Physicality (STP). And now we go with the transmutation.

Our very first trials will be in a way, understanding the work of our own system, to understand how they work. (:14). How do they actually respond. Does one receive and not want to give. We try to understand this in a deeper way, step by step. Up to now we used to take off 10 to 12 people a day into it. Now we are limiting it to four or five, we have to understand. We have to see if we can transmute the Soul first.

The first group of people will not see themselves by going from one (system) to another. But we try to see if they see, the dimension (D) of the feeling of the Soul from one system to another. This might take us a few days, it might take us a few weeks. But when we master the art of the transmutation of the Soul, in a way, we decide, with you, what you are going to dream, and all of you will have one dream. The chair on the other side and that's it.

You're not going to see the grandfather, you're not going to see the Moon, you are not going to Mars. Your aim is, "I want to be on that seat." Or I want to see, if I go on that seat, can I see me physically on this seat. Can I feel the essence of myself, on the seat on the other system.

We've seen people talk about having visualization, and some having the feel of the visualization. So it's not as easy as it will be. It's not just a valve of the gas system, as we saw with NASA last week, after spending \$30 billion. A little valve has caused a problem, and they had to abandon, and god knows when it will be working. This time it's the dimension of the field of the Soul of the Man (STM). This time it's how you as a captain, decide to take off or not. (:16). It's not in our hands anymore.

Go back to the first time we announced this new systems. We said you're a captain of your own soul, you're a captain of the decision, you are the one who decides where to go. And if you noticed in the fields, in the past few weeks, we kept to this criteria. We come to you and we tell you, that would you like to take your plane? Would you like to go somewhere? Would you be able to decide. And then it's you who decides, I want to see the grandma. I go and see I want to fly to the Moon, because I wanted to go. Some others come in with a different criteria.

Yesterday, for the first time, we had the most amazing experience on the flight system (FS). We had a couple, they've been together for 35 years, they know who I am. I'm sure they're listening. And the strangest thing with them is, we didn't know. We do not know who comes in. They've been Knowledge Seekers for two or three years. The lady is

Russian, and the gentleman is German. When they came out of the system, I said, where did it go? His aim wasn't to go to Moon. His aim wasn't to go to Mars. His aim wasn't to see the uncle or the cousin. They both decided before entering the system. Or they discussed what they're going to do. To see the Russian version of Jesus Christ. Or what we call, in the name of Christ. (:18). And that was something. That's all they wanted.

And both, because they made the decision together, achieved it. One in the intention and dimension of the light, recognizing, and one in the D of visualization, as a field. This is very, and vital point for us. Which means from now on, what was the whole thing, which we decided with the other couples we had.

If you remember the week before, we sent them to go where they want and the couple went home. They wanted to go home and the wife took the husband home. So we could see that, when two souls agree as a soul mate, they do the things the same way in the dimension of the evolution and transmutation. And this couple decided before they come, they didn't want to go anywhere. They wanted to see the same man, the same thing.

And this gives us opportunity to explore what we call, collective transmutation. A family wants to go to Moon, we can now, if the sincerity of the whole three or four members of family, is to go to the Moon, they go to the Moon. If the little girl wants to go to the playground, and I don't want to go to the Moon, but I going to the Moon because the parents want to go, she'll be left behind. Because it's not to her satisfaction.

So it comes to the point of we cannot lie, and it has to be collective. It has to be the same thing. So when we put you into these systems from next week, you have to want to sincerely, to be transmuted to the other system.

The beauty with this couple, most probably they'll be the first couple, (:20). which we land on the Moon, because of the what I call, collective understanding of the work of the Soul, with being with each other's soul ?? bound, as I told them. We are looking for those of you who registered to go to the Moon or to Mars, but we are looking for those who can give us the indication of it. The beauty of this couple we put to the Moon. So in a way, we have found our first couple, that will be landed on the Moon, through the system, when we start hopefully. Is that they can see each other, they can feel each other, they can tell us what they see of each other, what they feel, how they look. As we discussed yesterday, we give them a camera. Or do they come back and we register the emotion in a different D.

Remember, the man could never say how the other man looks, till they find out a permanent ?? , when they start ?? doing your painting. We evaluated our understanding and we went further, we came out with the still pictures, and then we made the movies, and now the hologram.

New way of making photos without camera - through dimension of Soul

There is another dimension in transformation of the knowledge and the pictures, in a way, what I see, I transfer to you through the soul, you see what I see. There is no need for a camera, there is no need for anybody else, if I don't want you to see, to see.

This new dimension of visualization is unknown to man. But through the system we set up, and the way it is, is possible. In a way, when they come, if they don't want you to see the picture they saw, you don't see. If they want me to see it, I see it.

When you talk between the two of them, they tell you look up, (:22). both see the same pictures, as I see. The new transportation pictures and understanding is at the moment, unknown to man. At the moment is a technology, which we gradually introduce in the coming time.

So with this couple, when we land them on the Moon, and we bring with our picture into operation, that they can take pictures. But we teach them how to use the dimension of the Soul to memorize, to remember, and the beauty with this is, nothing will be hidden. You see the full dimension with the emotion of the picture, which at the moment, you don't carry that emotion, you see a video, you see the laughter, you don't know what's happening on the other side, who's making this person to laugh.

But now you see everything, because you go through the dimension of emotion, the sight of emotion, the emotion of the laughter. The emotion of the what we call, sound, everything together, will be transmuted from one to another.

So what's going to happen in the coming days now that yesterday was the final stage of our development. We were looking before transmutation is, that we want those who come. Maybe the first 10 of you will not transmute, because your soul is not there to do it. You will physically want to do it. So we'll see how much we can. Because we cannot force you. This is the beauty of this new technology.

As I said, You cannot force no one to do anything. But you can put it, as we say in English, on the plate, and if they like, they can take it. (:24). The new transmutation system opens a new life, a new understanding. It'll define, it will explain a lot of things that we as a human race never understood in the world of Creation.

(Noise of liquid here >>>) What does this mean? You heard a noise I deliberately made in the background. And I muted it.

You heard I poured a liquid, that's all you know. But with the new understanding of transmutation, as we carry the essence of the soul of the noise, you will know if it was a tea, if it's sweetened, the color of it, what kind of tea? Was it an orange juice Was it an apple juice? Was it sweetened apple juice? Was it a coffee, decaf or (regular)? Because this is the new level of the understanding of the emotion of the Totality, which the new cycle of knowledge will open to man.

You cannot say, "Oh, what am I drinking?" I'm drinking coffee, but in fact, you are having an orange juice. Those of you who are alcoholic, you're in a bigger problem, you can't dilute whiskey in coke, and said, Darling, I'm just having a glass of coke. Because darling, will feel the essence of the vodka, the gene, what you put in. And then as I said, everything in this new dimension is open to Totality. You cannot drive down the road full of alcohol and say, "officer, I had nothing." (:26). Sorry, the officer can smell anything you had, he doesn't need a meter, because he works on a different dimension.

So, you will see the changes which will come. This is what is to hit us all. And with it, will come the same. The universal energy system, which we will introduce in the coming time, all of you will receive from it, the energy, the food, everything else, which you need. Correction of miss-corrections, misguided works, and what man does to himself, all will be a thing of the past.

Peace will come on this planet, when the T of the Creation is understood, through understanding the knowledge of the Creation, and not by what I call, magic. Not by what it might be, what could be.

Next week, when we start the transmutation of the system, it will be fantastic to see if people can smell themselves from one machine to the other. What happens when we give you perfume to the dimension of physicality, does a soul smell, in the other machine.

In so many ways, a new era in the Space Technology, Space Technology of the man to travel in the deep space has begun. We have closed one side, one section of what we call, testing, that, from understanding of it, of building of it, we allow the Totality to take shape in a given D. As I said to our design people this morning, because sometimes they forget, is that we want our systems at the moment, only to be for human race. (:28). The system, when it's sent up, carries a specific system, that conditions, Earth condition.

It's beautiful to see other creatures of the U. But it'll be beautiful to see if we can handle it. If are own structure responses to the Totality. There's a very big question, what are we going to do with those who are from other dimensions of the Universe, and they enter the system. In a way, with the new setting, with placing of the conditions of the Earth into the parameters, we will know which one of you, who of you, are not from this planet. Even though you feel, you touch, you eat, you create children in the dimension of humanity.

This will open a new dimension. This will open for us to accept that we are part of the Universal Community and they're amongst us. We respect it and we have to honor it. It's not to stigmatize it's to respect and to understand.

In so many ways, the new flight system, which coming into operation, will tell us you are from such a planet, you want to go to Moon, we have to change our system to you, that you have the same pleasure as a man on earth. At the same time, we have to understand how we bring these positions into what we call, working. (:30).

Yesterday, I asked one of our team, who does all our purchasing, can you get me a laser beam machine. He goes off, comes back, he says, this is what I can get, a little laser in the hand. I said, my dear, I want a laser, (that is powerful enough, that I can point at the Moon, and I can send a man with it, down the line and know where he lands. Till he lands. ??

In a way attachment to the process. We have already started the process of the landing on the Moon. It's not that it's going to come. We have to prepare, our systems have to be set. One of the easiest way on Earth, I'll give you a mobile phone, zoom, I can take you across.

But for the time being, till our people get to know, and we can find them and bring them back. This is the easiest way to do. In understanding the Totality, and the beauty with testing with the Moon, is the Moon has a fixed feature positions towards earth. I don't land you on the crater, and I'll pick you up on the rocks somewhere else. Where I land you, I can bring you back.

That's why we said we do the dimension of earth, to the Moon. Because this way, we can check a lot of things. Now you understand the transportation and transmutation system, which is kicking in, is far reaching, and will have much more effect. It'll have new dimensions, it'll have new understanding. It will create a condition of the detachment. It creates a condition for us as a research team, to explore the limits of the knowledge of the Creation. (:32).

I just had a sip of the drink. You as Knowledge Seekers heard the noise. You've been set to do this. Some of you who came to the center, you should feel it. I'll do it again. You feel what the sip is, what the drink is? How does it taste? What kind of drink it is. And what's the emotion, which is created by, within me, that the knowledge is transferred to you. As you are part of the structure of Universal Community through D of the fields of the universe.

Just listen, and try to see. We did a test with Rick a few weeks ago. This is part of the same test, but in the different D. Just listen. And then don't think, feel through the Soul, what it is. Write it down. And then I come back to it later on. Then you understand what the difference is. Not, "Oh, I guessed was right." Write it down, that you get confidence in your own emotion. You understand later on, what you have to adjust, what was missing? And are you connected to the Soul.

I open my soul to the whole dimension of the Creation. Now you try to see if you're connected.

(takes of sip of his drink >>>)

I give you a clue, it's a combination of emotion of different nations, different cultures. You got to remember, (:34). I've traveled the span of the universe, I've traveled the span of this Earth, and I've chosen the best of the best, when it comes to purchase of life. And

this drink, the drink I drink, has to give me pleasure. It's something that allows me to transfer my emotion.

The way, it's like a thirst, you're thirsty. We talked about it many times before. What happens when you touch that first, first drop of water in your mouth and you're thirst gets satisfied. Because water beyond entering, before entering your mouth is in a state of the matter. The minute it enters your mouth, your body, it's in the state of the Gans. It's in the state of the fields of the universe. And that's why that field travels the whole cell structure of the body of the man. The body next to you does not feel your thirst. It's only you who feels it. And when you take that first sip, every cell is satisfied.

So, we have to understand this. Last week I went through deliberately, in a different way. Asked about the centrifuge. How we do. How we work. How we look at the centrifuge. Many scientists have not understood. In a way, I referred to the centrifuge when we asked for the position of the Earth in respect to the Sun. There is no way, that the Earth is moving away from the center. (:36). And every indication of the knowledge is that, the Earth is moving to the center, if you understand the process of the Creation in a true way. Now, I explain to you why the scientists are 100% wrong.

First of all, if you just look at the physical position of the Earth and the Sun, yes, it could be moving away, whatever. But there are two major factors, which tells you, that they are getting pulled into the Sun. First factor, Earth is not stationary, it's a dynamic, and it's at the end of the string rotating around the Sun. So it's in a centrifuge condition. In a centrifuge condition, the heaviest always goes to the furthest out, and the lightest stays closer, to the center of the force.

Then, the major point, that no scientists, no scientific structure ever considered, Earth is in a vacuum condition of the Solar System. And the Solar System itself is in a higher density strength of the galaxy, and there on. So, the Earth is in two conditions. One is on the centrifuge. And secondly, on the vacuum.

What do we do in a vacuum? In a vacuum system, instead of creating centrifuge rotation, we create vacuum, and we get the same response. When you have a balloon, when you blow it, the lightest, or on Earth the lightest gases go further up. In the vacuum condition, the heaviest goes up, the lightest come to the center. (:38).

And this applies the same in reverse, with the Gans operation. Where Gans's is our amalgamation of the fields forces. This is why you see separation when you put Gans's on top of each other. Have you ever bought these colored sands, that you put them one sand over the other, and then you see they are separated. You can see which sand is where, and what color is where, and how they are.

The same thing happens with you. When you put Gans's together. You create through the vacuum, that condition of separation of the field forces.

But if you look in a dimension of the plasmatic condition, the stronger fields, is in the center, and the weaker outside in the D of magnetical (M). But what Knowledge Seekers have not understood on the other hand, the gravitational (G) it must be heavier, stronger than the M, that fines its path to the center. This is how your Soul matures to reach the condition of separation from the physicality.

How do we understand all dimensions, and working within the dimensions from each other? How do we separate understanding of the centrifuge, working within the what we call, the vacuum, (:40). and then on top of it, understanding plasmatic field forces, which forces the condition of the stronger field to be in the center.

They all are dependent on the condition of the manifestation. They are all conditioned of understanding, the work, the interaction of the fields of the universe. Sometimes matter state in the vacuum condition takes the center place, because we did it heights, the strength of the field of the Gans plasma.

You see that in the bone structure of the man. The body of the man is a total vacuum, absolute total vacuum, and the condition of the vacuum, inside the body man is even higher than outside, space level. In the tests, during our work in Bruges, in Belgium, we tested this. We created a condition of different vacuum strength, and we've seen how it operates. We create condition better than atmospheric, beyond in the space level, we go to minus 13 - 14, if we push it. Where atmospheric, cosmic atmospheric is concerned, around about 12. And we see the performance.

But what is strange, man has not understood in Totality, is how come, if by the law of the vacuum of the body of the man, the bone is in the center. Because every other GANS is attached to it, your muscles, your lip, your skin is all connected. It doesn't work, (:42). it doesn't come into understanding of essence of Creation.

But there is a vacuum condition inside another vacuum condition, which dictates, that the heaviest goes to outside. What is this vacuum condition? But this vacuum condition to create that field forces, changes into the ray of light condition, which is an amalgamation and transformation between one to the other.

This is why your bones are the shape they are. They are spherical, in essence of the field, but they are cylindrical in essence of manifestation. Now, you understand why your bones has such a structure. Because you missed a very important field forces, which sits within it, which is your bone marrow. Bone marrow creates that condition, creates a field rotation, and that is why your body can suck blood out of the inner ends of the cell, and the lymph comes in through it.

Our scientists, our man of medicine are ignorant in Totality of the science of the Creation, and that is why you have problems with the immune system. Because they have not understood you have a vacuum, within a vacuum, you have a centrifuge system of the field forces, not in the matter state, and then it leads to the Creation of the body of the man.

The biggest problem. The most important part of the whole structure of the building of a body of the man, and you all talk about it, you see it in every living cell, doesn't matter vertical or horizontal. (:44). Why, why do you have a calcium in every cell in the body of the man. And what does the rotation of the Fe as a blood, with this centrifuge system in a solid base, brings to you.

What you have in the body of the man, in the structure, in the bone structure with the center of the bone marrow creating high field levels, that the bone becomes the centrifuge ?? out of body ?? weight and then in the matter state it becomes itself, the pinpoint of the holding on to the next vacuum condition, which is the muscle tissue, on the skin of the man. Then you understand how life is created.

We need to understand this. We have to understand this. Otherwise we cannot create life in other dimensions. We cannot go through the transmutation through the field level. Then in another dimension, you get your brain, and your foot, and your skull will be solid calcium. Because you made a slight error in understanding the process of the Creation.

These are all part of the structure of what we will go through, from next week in the Enhancement system. Understanding the true process of the Creation, and not with the problems and understanding the process of what's going on today, with many of us, in the dimension of the health, and the rest of it.

If you have understood, if you been across with us, and seen people who have been paralyzed, people who have paraplegic, people who had no movement of part of the body, and within days or hours, they start moving. How many times you used Gans's where it was frozen body, (:46). and then the pain is gone. Because you transform the matter state fields, which is converting to you, to the emotion, to the dimension of the fields of the universe, within the universe of your body.

Understanding the process of Creation is 90% of the problem of the man, even the most intelligent scientists on this planet. They are single minded, in the sight of the knowledge they've been educated, and if they understand a little bit more of, they become arrogant, and they don't understand the rest of it.

When you become Knowledge Seekers, you have to understand the Totality of the process of the plasma, Physics, Chemistry and Biology, and then the essence of emotion, and then the essence of the soul, which is the plasma of itself, before it becomes again, the cycle of the matter state.

If you push the two extremes, you come back to the same. How much you have not understood. If you increase the alkalinity so high, it becomes acidic. If you give enough, you become a taker. If you create such a huge potential, you become from the voltage to a current, and this is what no man has understood.

Now, in the next process of regeneration of the teachings of the Space Technology, you will understand the emotion of the cycle of the life. You don't say, darling, I feel what you're going through, for sure, you will feel exactly what he or she is going through, because you lock into the emotion of the Soul. And you don't say, "no, you don't understand my pain." My darling, I've connected to you to the field of strength, (:48). not as a barrier of the field strength of you and me.

Then mankind become knowledgeable in the essence of the Creation, in the essence of interacting with a Universal Community, not in the dimension of matter state, but in the dimension of the fields strength. And then it'll become interesting for us, because we tried this with you before, and some of you tried it, and did not work with you. Because you never understood the whole essence.

Some of the Knowledge Seekers before they come for the first trials with us. They call their cousins, or friends, or boyfriend, or girlfriend, or whatever, "I'm going to come and see you, I'm going in the system." And it didn't happen, even though the cousin was sitting on the other end, and waiting for you to arrive. What's the reason? The soul of the cousin says, "no, no." You want. I don't, because I know what it's going to create. It's not the time for it.

This is what we saw with the couple yesterday, and with the other couple last week. Both Souls wanted and both Souls achieves. If you remember, we put couples in the back and the front seats. We put couples across each other, to see if the couple behind, has nothing to do with other one. If they still achieve, and feel the same, even being in different position.

So in the past six, eight weeks, (:50). we have tested every possible combination of the understanding of the movement of the STM. Now ask yourself a simple question. Check your paper, and tick your paper. What did I feel? We had a KS very recently in one of the teachings, where she said, I had a dream, or whatever, and I could feel a person had a pain, so and so. Then we understood, how that feeling, correct it was. The pain was felt, because of the collection, and correction of the, and in a way, closeness of the souls, and it was 100% Correct.

Now, check the papers. What did I drink? What combination, and what pleasure gives me, in understanding of the ?? memory. Then you see how much you have gone, and where you are.

Those of you who have been around it, for long enough, you know, I love green tea, especially in the morning. This comes from my travels in China, and understanding the essence the beauty of the nation, and why they do it. How green tea is actually a Gans, and in the first layers. And what they burn, and the first tea you take is Nano materials, which gives you the energy for a time. That's why a lot of Chinese are very slim, because they take the energy in the first tea. In a green tea they take, that first layer, because they burn it, they fry, in a way, (:52). they dry the black tea, it takes the shape quick.

So as a scientist for me, green tea gives me a lot of pleasure, but I carry the emotion of the nation, the culture within it, which has a lot of meaning to me. The other thing was a pure water, which the tea was made of. And I drink it very hot, a special way that I enjoy, to carry the energy. The other part comes from my background as an Iranian, which I like "sharbat", which is concentrated sugar, melted, and let cool down, and it sticks to wood, or a string.

It's the pleasure to have, because it's a rapid dissolved energy, especially to have when I teach. Needs a lot of energy. Those who have been around me, know, after 3 or 4 hours teaching, I am so exhausted, I need a whole afternoon, or maybe next day, to literally, recuperate from the time of the teaching.

Then with it brings the essence of the smell and taste of saffron, which this gives you an emotional elevation. Saffron to me has a lot of meaning, in essence of love and creation. And then when you take this sip, it revives, it revives the whole of the body of the man.

How many of you got all of it right? And how many of you got one of it right? And how much was on the knowledge of knowing, and how much of it was on the knowledge of the emotion? The beauty, the taste of green tea, the odor of saffron, (:54). with the sweetness of the sugar, as a human, which is the essence of his creation, and then the water of life. All at a very high temperature.

Now, what that emotion, what that ?? creates as the emotion within me, which satisfies my inner being, dimension of the understanding of the Totality. Then you understand how we will bring different cultures, different banners, different emotions, from different parts of the universe. Now that we become the travelers of the universe. Would you introduce tea to a man from Planet Zeus? The one who did to me, gave me a lot of pleasure, but how would you explain it, in the essence, then in physicality, that they feel the emotion of what you have, what you give. Is it love, or is it tainted with desire.

In the life of man, we will know how, and where, and the way we are connected. In the life of man, we will not, as I said many times, adultery becomes impossible. In the dimension of Universal Community, because the emotion of the Soul creates that separation. The emotional of commitment and connection, becomes, soul mate for life, unless some by agreement of the two has decided to separate. Not by agreement of one.

It becomes life without pain. (:56). The life within dimension of the universe becomes as true, as clear, as what I call, the light of the Sun, transparent and complete. In the process of Creation, in the process of transmutation, in the process of understanding the Totality, man from now on enters a new dimension of understanding of the Creation of itself, its own Creation, and the created, and that has created the Totality.

Would we have children with physical handicaps, once the man knows can create children with the essence of the Soul, and not the essence of physicality. And would these children be the light of the what I call, the true reflection of the Light of the Creator, as

the created in the essence of the Soul of the Creator, and not the physicality of the being, with all its faults and Soul dimensions.

Now you understand the children of Mitra, in the essence of understanding will be pure, even though they live in a different dimension of P. We have to understand, that the dimension of the physicality of the Man, is on this planet. The dimension of the physicality of the children of Mitra is the universe, of wherever they go, they fit into the society, because they came from the lights of that society, of the best of the lights, not those which are tainted.

This is what Mitra did in essence of the Creation, bringing the best lights from every fields of the universe, to create his own, her own child, that will be the essence of perfection. And that child is amongst us. We have to understand it, and treasure it to understand, that the new life, not is the first child of Adam on this planet. But the first child in the whole Universe to start a new Creation, (:58). new D in life. But the whole of the Universal Community, as a total, as a Unicose.

It's a new cycle, that has a dimension of physicality of the point of place, but in essence it's the Soul of the Creator with it. Mankind will come to understand this. Mankind has no choice. As a Universal Community, we'll make it to understand. Now, you try to understand. You will see. You go through the emotion, if now that you know what I drank, and what I drink, you'll get the same emotion as me.

Did you smell? Did you feel? Did you feel the essence of my soul wanting to share with all of you, and not be kept with me, the beauty, the taste which it carries. Did you take sip from the Cup of Life of the Creator? Then you understand the Totality of the process of the Creator.

Did it enlightened the soul or did it freshen the physicality? Mankind in the new way, will break through a new understanding, that the physical dimension of life has meaning, but does not have the importance. It does not have the priority. It's not to be detached, and I don't want to be here. I want to be here, because I enjoy, I want to enjoy the Totality of. Not to be a part time lover.

In a way, (1:00). mankind will come to understand the Totality of the essence of the Creation. Mankind will come to understand how man will go through it. How man will feel it. How will come.... How will come to be, to be what it is.

Today later on, we'll introduce that.

We come to see the change.

We come to understand the Totality and we come to see what it will bring to us. It will bring, to bring, to change, and to create that understanding from the dimension of the Soul of the Man, and how much of it we can understand, to do. What we can understand, and what we can do, and would it be in a position of Totality

We have to understand the Totality of physicality. (1:02). We have to understand the Totality of all dimensions, physical, emotional, transmutation, transformation, transferring from physical to what we call, transmutation and transfer, and vice versa, and understand the Totality.

How much can we change?

How much can we push to understand our own limitation. Humanity needs understanding of the Totality to be able to become the Man of universe, and this knowledge does not come freely, in how we transfer these energies across from each other. (1:04).

How do we comprehend the emotion of it?

Do we need to think to do or will it come to us naturally?

How natural does it come to us?

Then, would we always live in the dimension (D) of the soul?

Or would we live in D of physicality (P), or would we come to understand the border line, of which one is the soul, and which one is the P? Then comes the question, the big question for mankind, that those who we accuse of schizophrenic and multi-character, how would they spread? How would they share the singularity of the physicality? Or do we create another dimension of the problem for ourselves to understand their work?

Or would, if we have a schizophrenic in one system, (who) wants to appear in the other, (1:06). which other will manifest, or would they all two or three manifests themselves in another system, one as a man, one as a woman, one as whatever they want to be.

Then if we call in the creator, their parents would they have the comprehension of understanding? These are all problems. These are all situations. These are the realistic conditions, that we open from next week, by running the transmutation tests.

Where do we centrifuge your fields, and is the fields of one system, is matching the other one, that you will come out as a man on the other side. Very much, if we create another condition in the other system, will be the way, that say, you appear on Moon. The field strength of another dimension. But as a man, field strength. Then how would you look? How would you manifest yourself in the other system? Would you have 10 legs and 20 arms, because that's what you need on the surface of the Moon.

Now you go back to all the teachings we've done over years. (1:08). Where we always said, we have test trials before you go, you see how you come. Go back on all the recorded teachings, many times I referred to it. Now we have come to it. Now we will see. Now our scientists will create the conditions, that when you go on the Moon you'll see how you will manifest yourself and the others. The systems are physically made, they are in ?? bits.

As I said to them yesterday, I never let you in up to now. But from now on, you look from inside. What do we transmute from the other, from one side to the other? Do we get the perfection in both systems, that both mimics the condition of the earth. We foresaw such a situation in our designs.

That's why last time if you remember, I said, we put the people in the center. Those who want to be still connected to Earth, and the other system does not match the condition they want, they'll be manifested in the center of the room. It'd be very interesting for you to understand. In one condition they will be manifested in the room, would you still see your other half, in image?

It will be very much like when you dream. You see yourself in your dream, in the mirror, and you see yourself back. (1:10). I went shopping and I bought such and such a dress, because you in a dream. In a condition of soul, you still see your dimension of physicality, because that's what it fits it. Now you understand, the Totality of the knowledge of space technology is absolutely mind blowing. But once you understand it, what will be the next condition?

How would you feel if you're amongst two souls? How do you test yourself when you're among two souls and know, the both souls sitting, and knowing, and understand each other, but not knowing that they see both. This is one of the dilemmas that you will face in the coming time.

You sit between two friends and you'll see the emotional feeling about each other. Where they don't talk to each other about it. It brings a lot of new dimensions. It brings huge amount of headaches for those who see it, but they cannot talk it, they cannot do it. But from now on, as more and more of us learn, we will not think that way, because you know, that the side sees, what is the use of thinking. (1:12).

Then it comes, does the man need the emotion of the language and the voice? Interesting times are ahead of us. In so many ways, the perfection in understanding the Totality is upon us, we have no choice. And then what we need to do, what we need to understand is, how perfect this life, the new life, the new dimension for man shall be. How do we assess it? How do we understand it? And then how do we collaborate with it, to be part of us? And how closely, and how far can we push this, for us to understand, for us and to be able to push the what we call, the manifestation of the Creation.

To what extent mankind will understand the teaching of today, and to what extent, it will be the beginning of the evolution, and the beginning of what I call, a new way of living.

All of you who come in from next week, you sign a disclaimer, that you come in according to your will, and it has to be notarized. Don't come in if you don't have the letter with you. (1:14). Then you will give us the right for transmutation and transportation, or transmutation and what I call, relocation. We don't make it. You have make it according to you, and bring it with you. You will not go in the System if you have not brought a signed letter, notarized, registered, that you give the permission to become the test pilots in this series of what we call, "evaluation and development of the new technology." It has to be with your free consent.

We as One Nation come to change the operation of ?? the nation, and that's the man's nation on this planet. In a very short time, Keshe Foundation with announce the

establishment of One Nation organization. Which means the creation of Totality in considering the supply of food, energy, and everything else under the same banner, the same structure through Knowledge Seekers. We see crisis in the West. We see crisis around the world with the food crisis, and the rest of it, created deliberately or whatever.

As we have set up One Nation structure, and One Nation, One Planet, and One Race. Keshe Foundation will respond to this accordingly. We just waiting to see how this takes shapes, that is the best time for us to intervene. When your nations cannot supply you, when your nations cannot give you food, there has to be an alternative, as a, what we call, "Totality of One Nation." (1:16).

We'll open a new dimension in the patents, which you have, but you do not understand. With it, we'll release new technologies, that all can use immediately. That it takes the pressure off the hunger, heat, and the rest of it, from the life of the, especially the European and Western world.

As the Africans are well looked after. It does not matter how much the price of the oil goes up and down, if there is no gas, if there is no car to drive, as they live in the jungles. And the monkeys don't care. If they are loved by the man, or they are fed by the man, because they can feed themselves the same as the man in the jungle. Now you understand that the Totality of the knowledge and independence of physicality, has brought a pleasure to live in Africa, because you're already independent.

Let's see what comes up, and how, and how fast in next coming weeks, we can create the dimension of transmutation, that dimension of transfer, that dimension of further understanding, that by October, November, that time, we can bring you to Austria and ship you back home.

As I said to one of our Knowledge Seekers, as a couple, leave a phone at home, come in the car, and I'll send one of you back home in a different way. In a way, it means, we'll see the difference between the physical, and transmutation. And would the partner finds the other partner home, when he or she gets home? Was the desire to be home? The love is so strong to bring home. (1:18). This is what we tested two weeks ago with a couple, or last week with a couple. The desire to go home, was the same as the love was at home. Now you understand why we run these trials, that on the completion every soul gets what it wants, and what it needs, and what it has to.

Thank you very much for today. I hope you understood a lot more what is to come, I hope you understand the new knowledge, which is shared with you, far beyond the understanding of the present time. And then it will come like the first time introduced you to Gans's, and the different kind of energy.

Now we introduce you to a new way of living life in the Universe, and Man has no choice but you learn it, you can deny it, but you can run away from , because this time, you can't hide in the jungles of Africa, or behind locked doors. "What, it's got nothing to do with me," that it touches your Soul, and it has everything to do with you, it doesn't

matter where you are. Rick, if you can take us for a break and we'll come back then we'll take it a step further.

<< **BREAK** >> 449 KSW Sept 8, 2022 (1:24).

K- Yes, we're ready. (1:26). There's a couple of things I want to mention and to bring it in. One is that, as you remember, from all time we tried to bring the Gans work into different dimensions of work, and of what we call, materials of the Keshe Foundation. How people call it, "their work," they bring different knowledge's, and different way of their understanding into their work. Today, we have two of these. One comes from the Keshe Foundation itself, in how we have commissioned work. And one comes from one of our beautiful Knowledge Seekers (KS) in France. He's done a lot of work in the past. We heard from him in a few years ago, two or three years ago. And now he's made a made a collection of his work, in regarding the agriculture. It's beautiful to see what he's done. He was with us a couple of weeks ago, few weeks ago, as he went through the Enhancement Unit (EU), with his beautiful wife. They went through the system. They, went together to see Paris, and we explained some of it to you. He has made a collection of work, his work has done over. This is a work of 2 or 3 years. It's not just normal work. And he made it available to the Keshe Foundation. It goes into the agricultural teaching. It's already put up. We wanted to show it as a whole, but it's a very long .. teaching. It'll be shown for teachings for other people who are interested in agriculture, in part of today's work.

The other one is, as we said, we always worked into the understanding how the technology can be applied in different ways and different, what we call, different manners. And how, (1:28). we will see the artists will use this technology for their, what we call, their artistic work. Keshe Foundation sometimes got commissioned two sets up paintings to be released, as part of a new generation of works by the Keshe Foundation. These works, now is completed, and today we'll see one of them, a pair of them.

There's a pair, matching pair. But with different dimension of Gans's. They've been put on sale on the Keshe Foundation website. So, you buy two pictures, and if you put them in the room, dimension of the emotion, dimension of the temperature, dimension of changes in the room, we'll take, we will like to know. So, in a way, you buy an artwork, which becomes part of the research work too. But has a beauty. It has been made, and both pictures will be signed by me as a personal gift, for whoever takes it. This is one set, and this is the other set. They're parallel sets, and they've been done specifically by

Keshe Foundation, for Keshe Foundation, by our Knowledge Seekers, people who understand our work.

This comes on the back of the same group of people who we introduced through their artistic work, the Cup of Life, and the Cups of the Pressure and the Cups of the, what we call, Sugar. It's, those Cups you buy they're artistic work, their mass production, as it is made, one individual by hand, by artistic. (1:30). This is the other one. There are two sets of painting. This one matches this one. And this one matches this one. These are in one meter, around one meter, and one meter and forty size. And one of them is 90 by 1.2 meters. They are big pictures, and they've been put on the website of the Keshe Foundation.

When you purchase these, you haven't bought an artwork, this will be followed for years to come. As I said, when you buy them, put them across (from) each other in a room, in a space. Stand in (the middle of) them, and see how it feels, what it brings you. One is loaded (Gans's) two to one. These are, in a way, scientific work, that one transmutes feeling, whatever, from one painting to the other. See what changes you'll see in another wall. You'll see (changes) over time, and take pictures of it. Then see in six months time, in a year time, how the colors have changed, how was your mood, how you feel, how it brought you joy.

We put these sets of work in 3,000 Euros a set. It's taken a lot of work, it's taking a lot of Gans's, or combinations of a thing, and a lot of thinking to go behind it to be done. They're both for sale on the Keshe Foundation website now. We will introduce work like this from now on, the a way, very softly we introduced the Cup of Sugar, and Cup of Pressure, and many of your bought, many of them. These paintings are individual artwork, these are artisans, and will be promoted through the Keshe Foundation for scientific, and evaluation of it. We know a lot of artists try to do this, and they do this because, and there's hardly. They just do it because they want to make ??. This is done the way we want it, and it's done by our people, (1:32). what they put in it, and how they put it in it.

We want to see, actually what happens in this environment. The changes in the color of this painting, for me is important. What happens in six months time? Do you buy a red and a blue, and you end up soon with a green and red. It's a live interaction. These are live pictures, these are what will come, that shows your emotion as you pass between the two.

Would you be able to see the changes when you sit, and you feel happy, and the color painting changes. And when you're sad, the color painting changes. You come home, you look at the pictures, "oh, she's angry today with me." You come in home and look at the pictures, "oh, she's going to love me today." We are looking for a new dimension in understanding. It's only two sets of these available. And we would like, when you buy you enter, in a way, as artwork. All pictures will be signed by me, because it comes from the Keshe Foundation. And we want to know the history of these paintings, they'll be valued in hundreds of thousands in a short time. If you're in the investment of pictures.

And it will gain, because of its value, as a scientific value, that's what we are after. If you remember where we introduced the glasses (Vision Enhancement goggles) to you, for test, the understanding of the work with the people who fed us back with some information, gave us a very clear understanding of the Enhancement Units (EU), Traveling Units, and everything else, which now you see you're taking part (in) it. So, these pictures, these kind of work for us has a value. (1:34). It's not just that we put something. Because it's going to bring something forward.

The other thing, which we will, we try to show it today, but there was, we decided, in a way, to go in a very rapid way to the next level, because we see problems in Western Europe. We saw the government of England is planning on 130 billion financial aid package for families to support with fuel, and maybe other expenses which come. We have seen the Austrian government yesterday has passed the two or three billion package to come in December. When actually you still have to get yourself through till that time, that they give some 500 Euro per family to support with the increase rise in food and other things. But the crisis will be much deeper than this.

Keshe Foundation has decided to go for a direct intervention of the Keshe Plasma, what we call, Gas and electricity unit. This Plasmatic unit is going under the evaluation and development in the next few days, as we shortcut a lot of things through it. Once completed, it will be shown publicly in the next few days. The 5 kilowatt brings us the gas to create electricity, and uses a gas generator. The new system uses understanding of the technology of the Plasma to create its own gas, and its own energy, and with it we will introduce the interaction of the fields of the food and everything else.

Once we show this, is one of the freestanding units, once our team managed to complete it, we will show it. And then it will be rapidly available to all the governments around the world. (1:36). We have to come to an agreement on an open patent basis, and what will come back, which means the Western Europe does not need to go through the, what we call, the recession which is expected.

Then we have to see how we will come to an agreement with governments to disperse with this knowledge so rapidly, and Keshe Foundation to become as the government backing governments, in running governments. In a way, we provide the technology and the knowledge to create the backing to the nations, to start the beginning of the process of One Nation, One Planet, One Race. To replace the United Nations as One Nation, as the nations are already united in knowledge and technology.

As I said, earlier on, we have set up and we are ready to, in a way, introduce, and with it the acceptance of "One Nation policy." Where the new knowledge with energy, the food and transmutation and transportation bring a new dimension. And we decide as Knowledge Seekers of the One Nation, how our language nations will operate. We start the establishment of a "One Nation policy" through introduction of the technology available to every man at the point of need. They give you 500 Euro to be happy for a while, we give you the whole knowledge, the system and technology to be happy for a life time. Then you do not need to depend on the Saudis, and the rest, and the danger of nuclear attack by one

or the other. Because the change has come, and we bring force and the enforcement of knowledge. (1:38).

Introduction of the new technology will bring the introduction of the new One Nation policy. You as citizens decide with it. Now, as I said, we opened the patents on the other side, which you read it, but you never understood it. Now you read it, and you understand it, and the new cycle will start. Next week is not just the beginning of the introduction of transmutation, but it'll bring the other parts, because the same energy supply will be used in our systems for transmutation, as the ?? technology with energy power. Let's see what we can do, and how we set up 20 years ago to bring the basis of One Nation policy into operation through its need at this moment in time.

Are there any questions?

Q: .. What does the Soul of the Man look like in the eyes of the Universal Community?
Mr. Keshe said, they don't see the shape of the body, we are seen as spots of light.

K- How do you see the Sun? And how do you see the Mars, and how do you see the other stars? How come the Sun is a light to you, (1:40). and how come the planets have a matter state to you? Have you ever thought (about) that? Why when you look on one side you see the Sun as a light, and when you look on the other side you see the Moon as a matter state? Then you'll find answer to your question.

Conditions of the field balance, field condition, dictates the understanding, and observation and the emotion. In a way, if you understand it in an easier way, the tea is a matter of state liquid, till it touches the lips and the mouth, and it becomes an emotion. And then it still has the dimension of physicality, as we like to feel it as we consume it. It's the same condition. If I decide what to feel, you can feel.

A lot of people say to me, why you see everything and you let all these things happen. Because it has to happen, it has a reason, it has a cycle. I sat in China between a couple in the hotel, in a meeting. It was a very, very strange, strange meeting, and this meeting took place two or three times. Wang Lin was sitting next to me as a translator. But in a way, I didn't needed any translation. (1:42). I could read, I could see, I could feel the language of the two across the table, and understand the emotion involved in that meeting. It was very, very strange to hear what they're talking to each other, in the Soul dimension, what they were communicating, and what they were talking physically.

I got up, and I went for a glass of water, bought a bottle of water from the shop and came back. With my turn back to them, the conversation changed. I could hear, I could feel the emotion, the change, what they were talking to each other. I came back on the table, that was a deliberate job. And I saw how they changed in respect to each other, because either way, by looking at each other, they were communicating something. I walked away from this meeting, it was a beautiful meeting. The gentlemen loves the Keshe Foundation technology and does a lot of things for us in China.

But it was interesting to sit and tell them, I can see everything, and I know what you are thinking, and I know your emotions, and your feelings and what was going on. I asked for a second meeting, or we met a second time. I wondered if they understood, (1:44). but in the background, through the Soul, I conveyed the message to the other one. In the meeting, the meeting was very different. Because the interaction between the two was totally changed. The emotional interaction was different.

I said to myself during that time, when will man understand. I see everything, but I close my eyes, I don't need to be told. It's the choice I have. I choose the man's way, to understand the man's way of living and doing. It's not my ignorance or my, what you call, "being simple." It's just understanding that you live in man's world. (?? That's how it's ??) said, it's a man's world. Man made a car. It's a man's world, and man has made this world for himself in his physicality, and we have to respect it.

But it does not mean you have to go with it, and do with it. Many times, those Knowledge Seekers that are very close to me always say, "Mr. Keshe, you see everything, why don't you do it? Why do you go through all this pain? Why do you do these things?" I always say, "I have to learn something from it. That's why we came here." But we see everything, the desires, the lies, the cheats, and everything else. Nothing is hidden. If you choose to go through the path of the Soul, and then you live that Soul life. (1:46).

Once one said, the worst thing with you is, when you withdraw your love, hurts more than actually knowing, that it's not there anymore. Because when we enter a commitment of life, we commit with the full life and ?? the emotion of the Soul and nothing else. With a full love. Because we understand, then the Soul understands. But when it's broken, we move away not to take the pain.

This is what, as Knowledge Seekers, more and more of you will understand. What you earn, what you learn, what you see, is in the light, or it is in the dimension of physicality? How do I handle the Soul, and how do I handle the physical side. This becomes part of our responsibility, now we are responsible for it. Now we are responsible for the Soul and the Physicality. Up to now we were responsible to feed the Physicality.

The Soul was there, that is somebody else's job, called God, heaven and hell and the rest of it. Now you have the God, you are the heaven and you are the hell for it. Accepting the responsibility of the both, to be in the path of life of Mitra. Do good, because when you do wrong, you do it to yourself. Talk good, because when you talk ?? wrong, you do it to yourself, and everything else which goes with it. And when you act it has to be perfect. Because you do it to yourself, psychosomatic. (1:48). Man has not understood that yet.

Any other question?

I was talking to one of the Knowledge Seekers quite some time ago. And he said, Mr. Keshe, we know what you're doing, and where you are, and if you're away, or you are at

home, or you are whatever. And I said, how? He said, when your dog barks, we know you are home. If there is such a noise we know where you are. If you do this, we know what you're doing, and by the noises in the background we can tell you what you're up to.

Now, if you can extend to the knowledge of the Soul, you don't need to everything, the noise in the background, you touch the Soul. And you feel the emotion of what that noise of dog made, when it's made, or what happened when the other noise was made. It's interesting how fast Knowledge Seekers will become mature to this, now that the new technology is being opened.

Any other question?

R: Jalal had mentioned in the chat earlier, just after you talked about the green tea and so on. He says, I knew it was water and tea, and I even smelled the tea.

R: And I know for me, I can add that it was kind of strange. When you were talking about it, I had this impression that it was something sweet and hot. (1:50). And I couldn't figure out what it was. But here, strangely enough, here I was drinking a green tea at that moment. And not only a green tea, but it was my second cup of green tea. And that's the first time in my life, that I've had two green teas in a row. So, I was actually drinking it when you mentioned it. But my mind couldn't figure out what you were talking about, other than it was something sweet and hot. I kept thinking about coffee, but I thought, no, it's not coffee. What is it? I had no idea that you were a green tea drinker. So, that was quite interesting.

Q: .. Do you have a formula for the attorney. I think she means a form or something that can be printed out for people to take to the attorney to notarize? What do we put on that notarization?

K- .. First of all, about your tea. The green tea has a, what you call, connection to the Soul, because of the Nano structure, he has. When you put your Nano material in a given salt level, you know, it changes to Gans, and all stuff of our waters have ?? some salt. (1:52). So, green tea, the way it's made, it's Nano plated first, in a way, as you call it, has and creates different emotion, which in a way gives you.

If the Chinese understand how to use the green tea, or Man understands how to use the green tea, a lot of diseases will not exist. This is one of the reasons Chinese live a long, long, long life. If they understand it. If you make a green tea and throw the first water away, you have lost the process of the, what you call, energy, feeding the Soul, and then Soul deciding the ?? life.

If you drink it as a part. If you made the green tea usually, and you leave it in the pot it becomes a black tea, because the energy of the Nano particles is given to the environment. Green tea is actually a black tea roasted, which is Nano coated. Traditionally, when they collect the tea, they take it to roasting, the same night, the man who cuts it, or cuts and roasts it in a pan, and it just stays fresh as it is, it keeps its ??, that gives it, its color and whatever. The emotion you carry with it and you receive from it.

Regarding the consent, you have to write it your language that, "I give my consent to Keshe Foundation, and all the operations and subsidiaries," to me to, or for my body and my, what you call it, Soul or whatever, to be used for testing, and evaluation, and elevating the knowledge of the man. This is done with my full consent, (1:54). and nobody has forced me or whatever, to do such a thing. And I give all rights to the Keshe Foundation to do in the time of testing, and I have no claims whatsoever.

This is important, if one of you Knowledge Seekers understood it, ?? you can type it, put it back on the screen, we'll put it on. And if you have a lawyer around, write it up and give it to us straightaway, we'll put it on the, what we call, platform plate (website). But we need this because we are entering a dimension of the testing, .. a very interesting job.

Any other question?

Q: .. Are you still looking for Satellite people? The ones not coming to Linz, but operating from home.

K- Yes. The more, the more we have, yes. Enroll, pay for it, and there. We have a lot of people who've done, I mean, we know the list of Satellite people, we will probably know, it'll be known, because they will be the point of focus. We have more, and more people joining to become satellites. It's good to have.

It was very beautiful this week. The groups came in, we had two Russians, or we had Germans, we had Polish, what else, they came from, the Austrians. Last week, or the week before we had our first Afro-American. More or less we are piling in all what is needed. We're still missing Chinese. (1:56). They have not come in yet. It's amazing what is, and how that system feels, and how people come with what expectation they come. But yes, we need Satellite people. Some of the weeks we still do some other things. It's that, the standard test flight tests will still carry on in the background with some people, as they come in. Then this allows us to perfect our system to understand what goes wrong.

But from next Wednesday. Tuesday, we are closed. We don't do any tests. Next Wednesday, 14th. We, as I said, we have four going through it, it will take an hour or two, maybe less. We'll succeed or we do not, it all depends how our technicians in the background setup the system. How we see, how we do. (Wednesday they start the tests.)

Our aim, original target is not to take one (person) to the other (EU), it's actually to see if we can transmute the Soul. We'll do that for a few days. And see what we get, how we get, how we see. Then we'll most probably test the Soul of the Physicality (STP) and the STM (to send) across after that. Then we'll attempt the full transmutation.

Our team is building the first two Vertical Systems for this job. There are four new systems under construction development in the Keshe Foundation. Where 2 of what you've seen, if you remember, the Vertical Units, which we showed originally. Now

these vertical units as a transportation and a transmutation system (1:58). are literally getting developed to the standard, that we can start testing. This will be very interesting for us, in how our team will be there to bring this condition into, what we call, operation, and how we will change the whole structure, and the whole transmutation system.

Who will be allowed or who will not be allowed. What Soul allows you to go. If you're coming in to the system to escape, forget about it. It will not happen. If you come there to collaborate, to bring, share knowledge, you will find you'll be transmuted. You've got to understand you cannot cheat the system, because the system is you. We just provide (the system). You're the captain. We provide the facility. We give you the aircraft to fly it. We create the runway, in a way, to fly the aircraft, is yours.

You'll have to decide under what condition you really want to fly. And how far you want to push this, what we call, transmutation and the transportation. This Vertical System you see in the center is now getting set up, very much like the other system, ready for transporting, in a way, transmuting you from one unit to another. (2:00). We actually have a problem at the moment, where to put it. As you see just behind you, over there, underneath there are two large escalators right in the center of the exhibition. Above us, if you've been, it's like a huge metal structures of the back end of the rocket propulsion.

They're looking for where we can transmute without anything within the exhibition center. If we don't find a place, we move to a new location for this, because it has to be without interference. We'll see what comes up. Otherwise, we use, to go through the same system as before. As we have in the room, still, we actually, we have to find a location for this to start.

Any other question?

Q: Azar.. .. I'm always up at three in the morning on Thursdays when you teach, now it's five or four years. Before I ask my question, regarding the tea and coffee you guys talked about. This is something I learned, that coffee, tea, onion, garlic and hot pepper, not the black pepper actually, if you take them, it encages your Soul more. So, from 2018, when I learned that, I stopped taking them, because you can feel it. (2:02). Then when you go back to it, once in a while. If I go to someone's house, or traveling, it is in the food and, you know, I take it, but they have a very, very medicinal effect on the body, especially garlic and onion. But when you take it on a daily basis, it has a huge impact at the Soul level.

I don't know how much truth is in it. But I can see the effect of it, in case people want to know.

A question I have since on a teaching, that we do in Farsi, I teach the old teaching. When I listened to you, all these years, you teaching, you brought a lot of knowledge for humanity to free himself, or herself from the shackles of this planet, and release themselves from this painful living on this planet for people who are in physical level,

because constantly they have to deal with every aspect of their life in either the food, or energy, or medicine, or survival.

So, at the end, when I look at it, my question is, it's up to us. Because you constantly, I mean, the real field, in every teaching you constantly bring the same thing, and maybe in a million, or maybe a zillion ways you are trying to tell us, you can go to this point. But ultimately, it's the humanity's decision, if they want to go through this path. (2:04). You cannot force them. Because I see you constantly, you cannot, you're teaching us, but you cannot take us and put us there. So, the action has to come from us.

So, the question is, at the end, the humanity can get to the point that you're trying so hard to, from the first day until now, no matter what, you keep repeating the same thing over, and over again. It seems nothing is clicking for a lot of people. So, it's also possible at the end we bring our own demise, rather than go to the path you're showing us. It's the decision that humanity in Totality make, and for you it's going to be a lot of suffering if humanity doesn't choose that path. And for you it's a very painful journey, because every single day, every single minute, every single second you keep doing the same thing over, and over again, and hoping that they get that. Are we getting it?

K- Azar, I want to explain to you something, how we get it and what we decide, with everything we go (through). Experience of life is a very good thing to go to evaluate.

When I was a student in the second year, (2:06). in London, I decided I wanted to live in the center of London, than living in the outskirts, in the outside. I rented the, what I call, a room, .. like an apartment with a separate kitchen, bathroom and everything else, right under the loft, the top where the build, the beams, walls, and everything else. It was like five or six stairs of flights, on each floor level, one or two doors, apartments. In those, the part of the building didn't have any ?? lights in Knightsbridge, London, Bayswater, you know, the kind of buildings they are. I had to walk all the way every day, up and down, to go to college and back. The college was on the journey to go from Central London, to East London to Queen Mary. That was another emotional track.

But coming home, being in college all day hungry, you have to go through this flight of stairs. It was just after the Iranian revolution. When I took that apartment it was no, nothing, but being in the Bayswater, to those of you who know, in the center, it became the only was an Iranian. So, it became a house of Iranian, that were literally all Iranian living in that floor, refugees, people came to whatever they settles.

I used to think about, what I was going to cook. I was sharing the house with another, the apartment with another Iranian boy, and ... he was doing his PhD. Thinking about, (2:08). "oh, what I am going to cook, what is going to be ready, by the time when I get home." You walk the stairs up. If you know Iranian cooking, and the Iranian woman, the way they cook, the food has a ?? certain smell. On the floor you pass, you smell something else. The other door you passes, you smell something. By the time you get to the top, you have five or ten smell. I always said, this house has ??, you know what it is,

and the rest of it. By the time you get to the top you're confusing the decision you made at home, because with everything you smelt on the way up.

To make what you decided before you come home is a challenge. Because now you have all emotions of the tastes and the smells going through you, and how I like this, or I'll do that, and then making something on top, it was. Sometimes we had a joke with my friend. He said, "oh we were supposed to have this for dinner tonight, we decided yesterday, what happened, what changed? The smell (coming up the stairs). And sometimes when we used to get to the top, the other one was ??, We had a smell, that one, and that one, we are going to have this one, (regardless) ?? of what we decided yesterday.

This is emotion, how we can stick to it, and how we evaluate it, and how we understand it. Do we, and does it have an emotion with us. If you bring an Englishman going up the stairs, ?? (he doesn't have). It's just a lot of smell. But being Iranian has a different emotion, because the culture.

This is what we see, the Universal Council members have to understand, has to be from the language, understand. This comes to work when you come to work, and understand the work of human race. The desires, the change of emotion in interaction with other emotions, understanding of it, and being able to accept the pains of it, (2:10). as you try to understand it.

This brings a lot of solitude, it brings a lot of comprehension of the Totality. How we see it, how we accept it, and how far are we going to sacrifice to understand it? Is that sacrifice, brings us any gain? We fall in love with a partner, a totally different culture, different language, different things. And we try to satisfy it for that love, what we call, love. Then the cooking, then the language, then the way of doing things, and then you find out that it didn't work. It wasn't there, you understood, misunderstood and never been there.

A lot of people who work around me they say, .. I tell them, you don't speak English, you just speak English, the voice is English. But they don't understand the emotion, what it applies, what it implies. They say, you're not an Englishman, you are Iranian, how come? I lived there 30 years. I went as a young boy, I understand, I lived within the structure. Has the same value understanding to me as the, most probably more than what I understand in the Farsi language, because it's the time of the youth, when you understand emotions.

People who speak English they say, this is not what it means. It says in the dictionary, but it doesn't say the emotion of that word, its specific use in that dictionary. But with the Soul we don't have this problem. (2:12). It means exactly what it says, it implies and applies exactly what it is. This brings a lot of pain, a lot of understanding, and a lot of comprehension of Totality of the essence of a race. How much you are going to accept.

Q: Mr. Keshe, I understand what you're saying, because when I came here (to USA), I was only 20 years old. So, I've been living here for 41 years. Then sometimes when I go

to Iran, because I don't understand certain things, the culture, I get into trouble. Like somebody says, come tonight to our house, and I say, okay. But then I realize it wasn't okay, because the people around me, like Yosef and Dr. Bararpour say, no, no, no, this doesn't mean that, so you can't just go.

K- We call it, "Tarof" (Iranian word that means you say something, but you don't really mean it, but you don't want to disappoint the person, so you say to come over, but you don't mean it.)

Q: Because we were in North. We were traveling in a city with Yosef, that was his family lived, his cousin came in. And then the cousin. They have a factory they make all those porcelain plates, and cups, and stuff like this. We went to lunch and then Yosef said, my cousin says come over tonight. I said, ok, let's go. And Dr. Bararpour said, no, you can't just go like this, because they just saying it. I said, what do you mean they are just saying? They just said, come, so it means come. So, do we have an argument about that. But then I realized, and sometimes some people tell me, oh, you can have this bracelet, and I take it on and say, thank you, but then I had to give it back, because it wasn't meant to.

K- We call it Tarof. But this is part of our culture. If you tell somebody else, even with us, we understand it, we have a problem. (2:14). I do that with a lot of people when I go to Iranian shops somewhere and they say, oh, Tarof ??, you don't need to pay. One day I actually walked out with it. They said, where are you going? I said, you said that I can have it free. He said, no, it was just a Tarof. I said, not with me, I don't understand it.

Q: I should have done. I've done the same thing in Iran. The guy says, is no problem. When I'm buying something I said, okay. Then he said, because I knew what does it mean. He would laugh about it.

But Mr. Keshe, about the, talking about the meeting in the Soul level and Physicality actually. I mean, a lot of us, since ?? understand it. Actually, if I didn't know what I know, the life would be so different, living in a Soul level makes life really easy, it's a playful and is joyful. Because even in the morning when I leave the house, I tell my husband, I'm going to physical world, I come back and I see you tonight. So, because I know I'm going out there, and I'm playing a role. If it was in the past, the way I look at it, if I act on it on a physical level would have been a lot of like, maybe tension and a lot of things. But when you look at it, at the Soul level, everything is pure, everything is crystal clear. Even when you go to that level, you can see people's intention, you can see people's play game, you can see people's lie, you can see everything, nothing is hidden from you, because it's very clear.

They don't know, that you know, you can see, but you see. For me it's easy to interact with people, because I can see everything clearly. So, I just play my role in that interaction. The most beautiful thing is, when we go to the Soul level, and then with the, with the complete clarity and cleanness of your talk and your action. (2:16). Actually, sometimes I notice the whole. If you have a meeting with someone, or in a gathering, and

you're speaking and other people, because of what they go into, because they enter the physicality, they're not familiar with the different roles, although they have a lot of tension, maybe a lot of assumption about different things, and they don't understand it, the way you act on a Soul level, suddenly, you see they actually come into ease with everything. And at the end, you see the whole, the person is changed in a way that you say, it's interesting. Like, as if you're holding a space and the way you acted, you changed them in a way, that you never thought is possible. This is a beautiful way that I think all Knowledge Seekers, that now they understand this, when they go about their life in outside, they just interaction with people, it just changes people. Then you don't even have to put much effort.

K- You know, something I said to one Knowledge Seeker once. She said, when I go to such a place, I don't feel good. I said, go inside, go in the room, see if you don't feel good, come out and wash your face and your head with, take it with you, a combination of CO₂, and Zn, and something else. And go back into the meeting again, or go back into the same room again with the same people. See how you feel, if your emotion, your feeling, your understanding changes. And she did.

Then later on she said, never ask me to do this again. (2:18). Because I found out 80% of the wrong things I was looking, was with me, not with them. It brings out a lot of how we see with each other. You've got to understand, a sit in these sessions of Enhancement trials, and sometime simple things touches you, sometimes the emotion of single things touches you.

I'm sure the ladies listening, people who are around know what I'm talking about. This lady came to us very recently, and she went through the system. We didn't know anything about the background, I don't read anything about people who come in, then it gives you a pre-mind, preset mind of what to think, of what to do. She came out of the system. She says, she's got a breast cancer on the left side. That was after what she told me, that she went in the system, and she sorted out the problem, which she, or she managed to get to the soul of the mother and the grandmother. And between three of them they sorted out the problem which was never sorted, which was mainly to do with the love of the mother for the child, or whatever it is. She says she's happy she came, because she settled the score, or whatever, she settled the problem.

I said to her, maybe you have changed the condition of your cancer, when she told me. Because left breast of a woman goes with the mother and the daughter. (2:20). She has no children. I said, now you've changed the emotion, let us know if the cancer changes. If your body and your life changes. And what will be the outcome.

We bring that change through emotion, dimension of physicality. I'm sure with a high percentage, we will see a resolution to this cancer, because I know what has caused it, what is the reason behind it through our research, and development, and everything else, and understanding the work of the Soul.

But what will be interesting is, what she will take from this experience. What would add to the beauty of the life, and life might end with this cancer, or (is) life going to be extended? Because of our understanding what caused it. So, it's not only the interaction of the people with our emotions, but the interaction of ourselves with our emotion, which is the biggest problem, which man will solve from now on. (2:22).

Death through cancer, death through self inflicted emotional psychosomatic will become a thing of the past for man. This will give a new dimension and extension to the life, physical life of the man. Because we will handle these emotions at the outset, not at the end set with a cancer and the other things, which comes with it. We'll see, and most probably, a lot of people will see more and more.

In these trials past few weeks, we have seen the effect of the expansion of the Soul and change of physicality. We see it, we've seen even yesterday and the day before in an amazing way. The gentleman with a Parkinson, who could only write one word, the word diminishes, goes in the system for the flight test, and comes out with being able to write 5 sentences without a stop. And he hasn't done that for 10 years. If you say that to anyone, they say, it's impossibilities.

But in fact it's the Soul, which does the job. It's the expansion of the Soul to get ready to fly, balances a lot of things and the physicality is accepted. If you remember, when we brought the Chinese guy in a wheelchair, and a few days later he was running. We saw this yesterday, and in the day before in the Enhancement Center. (2:24). The speed which works, the speed which changes, because the Soul can fix the physicality, which he created, no medicine can. Now you understand what happened to the Chinese man and the other Chinese woman who went there. All we had to do was to understand the work of the Soul.

Any other question?

K- I hope you enjoyed your trip and experience with it.

Q: Yes, I did enjoy it. But also at the same time, I forgot to tell you that, you know, when I went to the unit the first day. Because I went to the one that you feel, and I felt the expansion of the Soul. You know, because I was sitting in the new unit. I didn't get the scared, because I said, Mr. Keshe is here. I said, when the feeling came, I didn't think about anything, at all about it. But then I realize, I had that feeling sometimes, a couple of times at home. But since I didn't know what is happening, I want to get away from it. I said, somebody may be attacking me. It wasn't a familiar thing for me. So, that experience, it teaches something about me. If it's happening, I should allow it to become further go, and expand more. I shouldn't try to distract myself and just say, please go away. So that was a good thing.

K- I think it was a nice experience for you and your husband. I think he felt it in a different way.

Q: Yes, he did. Because he sat in the machine that he could see and feel.

K- Thank you. (2:26).

Q: .. When do you get the date? Or where are you needed? And how long does it take with the mobile phone?

K- What do you mean by that?

R: I think like, she'll sign up on the website. I think she wants to know, when she would be notified. And how long does it take? How long does the process take?

K- What do you mean by that, how long does it take?

R: Probably, like is it over several hours, or I think you mentioned a couple of days.

K- It all depends in how. We inform you beforehand. Depends on the conditions, how we want to do and how we set things up. And how it will be done.

Q: Does Mr. Keshe know if you have the right Soul for this? Or can it be that he said, no, you're not right for that?

K- I have no right to decide, your Soul decides.

It's a beautiful thing, I've just received something for our, what I call, a lot of you who work with Keshe Foundation, people we have a what I call, news broadcast room. One of our Knowledge Seekers fills up all with the latest news all the time. There is not a day you don't get something from her, a few, or 10 or 20 things. She just sent something which inspires something. Maybe that's the reason she sends it.

It says, (2:28). the world's biggest cruise ship is set to be sold for a scrap before first voyage, as owners go bankrupt 1.6 billion vessel. Things with 20 decks. Very, very interesting. It triggers something, very interesting for us.

Could we acquire a ship like this to become the center of the world's government? A ship with everything, an independent nation, that we can float to any nation. It's a very intriguing thoughts. Would we be able to spend that kind of money? Would it be given for such a purpose? Or is better to be metal, the purpose for this is a very nice thing. It's a seed for thoughts.

R: What if you can make it fly? I saw that article. I couldn't believe it, that they'd have such a large ship, and they were brand new, and they're going to totally tear it down into scrap. They're threatening to do that, if they don't get a buyer.

K- I don't think anybody would go and do that.

R: It needs another, it needs some refitting to finish it off, like about \$300 million dollars worth apparently.

K- Yeah, 1.6 billion. Just is, what is it. The American government spends in a day also for military applications.

R: It's like buying a country for that much. Like you say, you can move your country, or your World Organization.

K- It becomes a very good headquarters. (2:30). If you have some change in your pocket Mr. Crammond, 1.6 billion?

R: Maybe some of my relatives do, but certainly not me know. No relatives that I know.

K- Oh, we have to ask to the Mr. Bill Crammond . He died with the last, we'll have to ask the Crammond family.

R: Yeah, maybe I've gotten inheritance there somewhere. there's billions of dollars...

K- They hold all the Queen's wealth.

R: Exactly. Well, some people are actually going for that kind of thing. They're trying to get back the money they paid in interest over their mortgage for 50 years, and saying that the banks took that money and reinvested it. So, they should get the interest and capital from all that, instead of the banks. So, we'll see how successful they are at that.

K- What is interesting is that, if you can think about what we hear in the news. Where is this new Prime Minister of England going find 100 and 30 billion to support the present economical situation with energy and food? We have to understand, what is the population of England, 70, 75 million. If you give 10 euro to each, instead of 50. If you give 100, it's 7.5. If you multiply it by 20, which is 2,000 euro per family budget. It's about 130 person, .. that's 130 billion. (2:32). But where is this money is going to come from? That the government can guarantee to pay to his nation, for 70 million people, to take some pressure of the fuel crisis for next 18 months.

Then you understand how much governments have stashed away, what they're planning to do with, or what they haven't stashed away, and they're trying to take from ?? you.

This part of what we. How much do we pay when we go on the Moon, if you see the others? Has it got any value, what we call, value of money. A few meters above Earth, everything we fight for has no value. You could be there, or your Soul is there, it's no value to it. Absolutely no value to it. And what are we fighting for?

Any other question?

Q: About this teaching what put me to think the most is when Mr. Keshe says, "with the emotion of the Soul, you transmute to any position in the Universe." (2:34). I wonder what this emotion of the Soul is. What it is like, and in which condition we will reach it? What do we really need to achieve this condition and elevation?

K- .. What about if you say, or if you understand that you already have it? You denied it. You don't need to reach it. It's already part of you, it's already in you, it's already born with you, and you are because of it. That's all it is. That's all it needs to be. That's all it is, That's all it has to be.

That's all you need to understand.

R: Is our attachment to the physicality that prevents us from feeling that emotion normally?

K- What do you mean by that? (2:36).

R: Well, you say that this emotion of the Soul is present, but we don't recognize it, or we don't pay attention to it. Perhaps because our attention is busy with our attachments of the physicality. I'm thinking that this, that we have periodic times through the day that this emotion is available. If we don't allow our physicality to just kind of smear everything through as part of the general hubbub of life.

K- We prioritize. We give priority to our physical dimension, than to our Soul dimension. We've done that from the point of birth. Which one has a priority, and which one can do. If you're taught from the establishment of the fetus, that there is an option to live both. How would it be?

It's very interesting point, that we are aware of it from when we are in the womb of the mother. But we are not aware of it when it comes to physicality. Children hear the parents during the womb of the mother. But the Soul feels the Soul of the parents.

In extreme cases, we see birth with the psychosomatic damages prior, or immediately after the birth, (2:38). which means that the Soul has gone already through the phase of pain, whatever, and it has already gone through psychosomatic changes.

Children with skin disorder, children with digestion disorder, children with a breathing disorder, at the point of birth. What I always say, you look at the end product, go back and look to the, before end product, what caused it. How much battle has been between the husband and wife. How much battle has been between the environment of the mother, in different shapes or forms. Not necessarily shouting, and howling, emotional and the rest of it. You'll find out you can sort it out straightaway, if you have the right position. Not by creams or whatever, by elevating the Soul of the child, the infant.

If a child is created in the dimension of the Soul, you will not see so much illness, or whatever. Because it fits itself. It does itself, what it is. A child which is born in a house of love and care, a true love, a true care by both parents in its own levels, we see a different character. We see a different physical life which is a lot of love, but a lot of forces, who's the boss in the house, and everything else, not necessarily shouting. You see the child is always sick, always sick right through the life, because you touch the Soul which feels it. It doesn't need to be to be there physically, and the physicality manifest itself ?? (2:40). 90% of the children illness in the first years of life, all preset in the house in respect to the mother or father, and how they brought up, how they talk, and if it's true love, and true understanding.

Parents don't understand this. A life which is full of adultery, and everything else and is supposed to be perfect, gives that kind of conditions. The adultery doesn't mean sexually, it means by thoughts, by, "oh, he likes this - (therefore) I do something else." I do something because he doesn't like it, (but) I like to do it, and the rest of it.

You see, it's very intriguing for people who understand the process of birth. You see from very beautiful parents, very beautiful children come. What's the reason for it? Genes? When you see some beautiful parents, some of the worst, not desirable children. When a

man is happy with a beautiful woman, when a woman is happy with a handsome man with her, and I'm proud of being there. That happiness, that joy, creates a happiness in the fetus. It comes the same, it's a combination of the two.

Doesn't mean that other people can't do it. But the same, when you see the brightness out of it, it could be any color, any race, doesn't need to be very handsome, pretty children. Handsome, prettiness, beautifulness, (that comes) out of the conduct, out of the physical behavior, physical life, not the beauty of the face. "Beauty is a skin deep." (2:42). This is what mankind has to understand.

We learned a lot with the new understanding of the cycle of life, people more, and more understand. Then you understand, I always said that, but it's not cruel, but if you understand it fully. The true essence of one life child policy of China, if understood in the level of the Soul. To keep that one life, one soul to the point of his maturity, to perfection. It's more than enough to have one child. It's more than enough, it's like an army, to look after the perfection, for that single child. One day, man will understand it. You don't have time for more.

But nowadays we get them the best cloth, the best, but we don't nourish their Soul, that the best will come for its existence. It was very, very, very interesting how man will change soon.

Any other questions?

Q: ... Good morning Mr. Keshe, (2:44). and a good morning to all present. Mr. Keshe, I was watching the 380th KSW, where you show a position below the Uvula, and explain that the higher force field of the air is transferred to the Soul of Man. Then you explain that the positioning of the mouth, and the nose is planned by the Soul of Man, for its own use. Further on you say that if we create a condition below the Uvula, we can expand the Soul beyond the physicality.

Then I moved to 125th KSW, where you explained the interaction of two reactors with two nucleus, and then you tell us to go to the first few pages of Book 1 with that understanding, and when I read pages 14-15 and 16 you talked about reactor technology, Fission and Fusion by Plasma Dilution, where it talks about plasma dilution and .. the Coulomb Barrier.

Then I continued watching the 125th KSW, then you call Douglas from USA where he talks about making a reactor with 2 nuclei, in which he had copper oxide in the center with water plasma CO₂ plus a drop of his blood, and in the outer ball CH₃ with liquid, to elevate the pH, and he talks about the plasma light, that he saw when he rotated the balls, and also tells that his wife saw him move in slow motion.

So, I ask you, ... (2:46). at that point there is a connection between the CH₃ carbons of the outer ball and the CO₂ carbon in the center, and since Hydrogen is lighter than

Oxygen, it expanded the fields? Was this the result of the Plasma dilution, and the breaking of the Coulomb Barrier as you talk about in the book?

K- The breaking of the Coulomb Barrier it creates, releases energy, and that energy is what we see as light.

I was explaining yesterday to one of our Knowledge Seekers, the body of the man, the energy within the body of the man is equal to 18 Hiroshima bombs. If you calculate roughly how many cells are in the body of the man, and how much that energy was, then you can find out the energy of each cell. Then each atom, which combination of it's work has made that cell.

But it's not just that energy which creates the light, it's the speed you release that energy to another environment, that the friction of it, releases the light. This is part that a lot of Knowledge Seekers again don't understand.

When you release a nuclear bomb, there's no harm done, it's just a massive energy. Unless, and until it hits your body. (2:48). That energy is counted, what effects will have on you. How much it enlightens you. How much it will move cells within your body, and how much other things can happen with it.

So, it's not how you connected the carbon and what was the energy, it's how you manage to release, with what speed, that one. So, we see this as part of the work. How we create that speed of release, and sometimes you can do it by stripping, sometimes you can bring it by collusion, and sometimes bring it by all sorts of movement. How we understand it.

You might not see the light as a visual light, or you might see the light at the Soul level, because that light still comes from interaction of the fields. Coulomb Barrier is another skin on the structure of the onion, still there is more inside it as you peel, one shell to the other, and the other. (2:50).

I just been told that the universal picture, the twins, has already been sold. So, it's only the other one left.

You've got to understand that the collection of fields and their interactions which creates, and how much you can add on, and what you can strip, which releases. This is part of the work which we are busy with, and understanding of it, will create a lot of mayhem for a lot of Knowledge Seekers.

Any other question?

Q: Mehranez ... I'm glad that Knowledge Seekers are taking part in the researches. I hope one day it will be my turn. Now that you answered the questions about the physical problems related to Soul, if you permit, I have a question of which, it's a long time I wanted to ask, but I didn't permit myself.

It's about a person who is born with the part of the eye, (2:52). the nervous system in the eye, the nerves of the eye don't work from the birth. Even though the father is a doctor, they couldn't say what it was. Only that the mother had fever, maybe for a few days. So, this person is a complete adult, very gentle, extraordinary memory, he could have with his eyes, which are very little capacity. Get a post-doctorate in abstract mathematics, and he remembers everything he reads. Very human, very outside the standard norm, kind person. Now he is adult is getting old, and I wanted to know. First of all, what does it have to do with the Soul of the parents, or environment at birth, does it have anything to do with that? Or is it just an accident? Is it just by something in this person who wanted to show even with these eyes, can do something? If there is something in future, to do with people who have low eye capacities to do things with their mind, or Soul or brain? Is there any future betterment for these people, when they get older?

K- It's a combination of everything. It's a combination. We've got to understand, if I can go deeper, because we have to understand it. (2:54). Some people might say it's cruel, but it's the reality of it. It's the combination of all what you said, plus the interaction the fields of the Souls in the dimension of physicality, of their forefathers.

The way we look at the eye of a child. We say, "oh, it looks like the grandmother, mother, grandmother used to have this color of eyes, or this color of hair, or this kind of hair," yeah. So, it is a collection. That's why they say, Bahauulla, bless his name, said something very, very interesting. He said, pray for your children 20 years before they were born, before they are conceived.

Most of the people in Iranian culture and Middle Eastern culture used to get married at 10 and 11. It means that the grandparents have to pray for the grandchildren to be born, not alone the parents.

This is what we say, go back to understanding of the true life of Mitra.

When you as a great grandfather, great grandmother, don't do, don't say wrong, don't do act wrong, don't do wrong, or think wrong. So, and your child learns from you, that perfect child to be born, the grandchild, or great grandchild is still perfect, because it's there, condition of the environment is there to interact.

But you create a perfect Soul. That with it, will use that imperfection to become a source of elevation of the others. We are here to serve, and not to be served, at every level. You understand? (2:56).

This is what we say, "what did they do, was it?" No, go back. If you inherited the color of the eye of the great grandmother, so you did her sins. So you did her beautiful work. It's not exclusivity, it's inclusively of all.

That's why when a race all work the same way, do good, and do everything else correct, the society becomes correct. Then what do you expect?

There is an understanding of the Totality, which is the biggest problem. We always look at the individuality, and single positions and phases. We don't look at the total.

Q: Well, I thought that his both sides, are from military family.

K- ?? military family. Who did they kill? Or what did they do? or who they supported? Doesn't go what you did, it depends. I mean, what kind of job you come from the background. It's what was the outcome of the background, the Soul of those ?? who you touched.

I was talking to a world leader, sometimes ago. Very, very influential world leader. His words were very touching. (2:58). But, his understanding of separation from it, was in a way very touching too. As the head of the state, the last say, if somebody is sentenced to execution, goes to him, or to the head of the state. He said, I cannot carry such a burden. So, I have put a group, they decide, that I don't have to carry, if there is a mistake in judgment. That I do not bring that problem into my bloodline, by killing someone who is innocent.

It shows how far this man has thought about even his action will affect his future generation. This is how we should live. I admire his work. I've done a lot of work around him, with him. It's amazing how, as somebody who never had to work in this life. He is born and bred with a silver spoon in their mouths, as we say. He could have anything, any man dreams, but as a head of state he does not want to carry the burden of his judgment, that it might touches his future generation.

This is how man should be. Then why do the grandchildren and children come with what we have? (3:00). And the great grandchildren, and God knows the whole race, or whatever, which comes from it.

Any other question?

R: .. I also wanted to know if you wanted to play the video of Joel Richard. The grapes video. Still want to play that as well? How would you like to proceed?

K- Yes, yes. Why not? Is Joel online himself, that he can explain? Do you see him?

I put the pictures of the two paintings, which is done during Uno center, they are a couple. One is already booked and sold. I think it's this one, it is the universal one. The other one is still available.

Let me see if we see Joel. Yes, here is with us. Let him explain the background to this video, and then we show the video. Joel, thank you very much for being with us. Would you like to explain the background to this work? What we're going to see please.

Q: Joel .. Hello, Mr. Keshe, hello, everybody,

K- Hi Joel, thank you very much for your hard work over years.

Q: Thank you. First, I just want to thanks Yvonne, Mark and Rick to send to use this video, and thank you Mr. Keshe for bringing us the technology and encouraging me to shoot this video. So, we have done it last year from March to...

K- Could you give us a background.... please. (3:02).

Q: I am a Knowledge Seeker living in France, in southwest of France near Bordeaux. I am studying with, during four years, and I try to help many farmers in agriculture. I spend the technology in France from east to west, and we are going from Bretagne to Marseille every month to spread this technology. So, near our town we have many vineyards and last year we decided with you. It's you who have given the idea for this video. We are shooting it from March to September, and during all this or this period we have shot every 50 days with drone and camera, to show you how the Gans were able to protect and facilitate the growing of the grapes.

Sorry for my English. Do you understand me? (3:04).

K- Yes. So, carry on please. Explain to us what would see in this video, please.

Q: .. We have started three years ago, and it was at the beginning. We have only one parcel to experiment with these Gans's. And after the first season we have seen that all the grapes were very, very good health, and they didn't have any diseases, during all the season. In (our area) we have many problems with several diseases and (for our grapes we had) nothing. We have continued one season again, and again, and again, and today we are harvesting now in 2022. And we have no problems. This is ?? (harvest is) beautiful, despite the weather, where it was freezing in the beginning of the year, and the bigger it was on July and August. So, if you want, you can. (3:06). Rick, you can play the video, if Mr. Keshe is ok.

K- We are perfect with it, it's just that we needed some explanation, that it's not just a video, but people understand the whole thing behind it. Rick, would you like to play the video, it's about 18 minutes.

R: Yes. Just to let people know it is in French, but it does have the English subtitles as well. Okay, let me just double check here. Here we go.

<<< Video showing the application of the Technology on vineyards >>> (3:24).

K- Thank you very much Joel. That was nice. Could you explain to us, because the thing was going too fast. What was the outcome of the harvest compared to the natural one? That others who don't see the video, they can understand it. People just listen to the voice recording. (3:26). >>

K- What I said was that because a lot of people listen to this as a recording, they don't see the video, or they just listen to mp3 of it. Can you tell us what was the outcome? What did you, what was the difference at the harvest increase, or reduction, the quality, or the quantity, or the color, or whatever?

Q: When you do one yard, we have laboratories which are testing the vines, the grapes, during all the season. And of course, we have a criteria of quality, and quantity, of sugar in the grapes and all are very, very good. We had no problem with that, and also our harvest is in abundance. (3:28). Many, many, many grapes, with many grapes.

K- Yes, but was the harvest more or was it the same?

Q: Yes, it was very, very more, more.

K- How much? What percentage?

Q: 150%

K- So, one and a half times more harvest. How was the quality? You had no diseases during the trial?

Q: No diseases, and the quality was very good.

K- Okay. How much does it cost compared to the chemical side?

Q: Chemicals on these parcels, cost 80,000 Euros per season?

K- And how much does your system cost?

Q: Nothing, Mr. Keshe.

K- No, I mean, you still have to buy the pipe, you still have to make the Gans.

Q: Yes, but 200 Euros, perhaps, maybe.

K- How much do they need to pay attention to? All the problems we have with agriculture, especially with black seeds, wheat, rice and the rest, to continuously keeping the system, the vegetation growing with the feeding with Gans's is very difficult. They just give up after about three, four weeks. Then it comes back to beginning. (3:30). But, how do they manage it? How often do they have to look after this system, the Gans's and the rest? Or once they put it in the beginning of the season, and that's it?

Q: Oh, no, I put it in January. And I am looking every month

K- But you go and fill them up?

Q: No, no, no, no, I don't have. Because many of them, the majority of the rings are four years old now. I have took several of them and brought them back to my laboratory. All the Gans's are staying inside the rings. No problem with that. But, we have definitively stopped with the sphere.

K- With the rotating a sphere.

Q: Yes, yes, ... we are (just) using the rings.

K- Okay. Can I add something here. Keshe Foundation hopefully for this next year, coming up season, we will introduce a new kind of agriculture. The way we've done at the moment, we are busy with the flights and everything else, which is going on. It is something we've done. But then you don't need to harvest, or to put rings on it anymore.

New technology will be introduced, we already developed this, just we don't have time to bring it out in the market, or to show it. But this we developed, because a lot of seed growers like wheat, and the rest, need that to be benefited all the time. We explained in a couple of teachings before. (3:32). I know our friend in Australia, and others in Canada, were looking at other aspects.

But this will not need any more watering or changing, you totally handle it .. in new way. We change the whole environment as a whole, not just a specific. And you can change the harvest. I mean, if this year, you want a slightly different kind of grapes, you can change the environment for that grapes, not the same as last year. You understand? So, it's very nice.

But how many farms are you looking after now? What is it? How many?

Q: In France we have many vineyards in Bordeaux. And now we have farmers in Bretagne .. is in the West of France. And we have farmers, which we are using for vegetables, and they are beautiful results. Very beautiful results, with more harvest than before.

K- Okay, that's beautiful. Thank you very much.

I'll leave it if there's anybody else who wants to ask a question.

Q: Thank you Mr. Keshe, thank you for all you do for us.

K- Thank you very much. But it's beautiful what you've done, and you put years of work into it, to show the change. It's amazing what Knowledge Seekers are doing around the world in their own field of work.

Q: Oh, yes, I thank you very much. But, and I can help everybody.

K- Thank you very much. If there are any questions, please ask. (3:34).

R: There were a couple of questions that Joel had answered in the chat, about the Gans rings. Do they have only Gans water? And you said, no, not only plasma water, we need solid Gans to stabilize the energy flow.

And Nikolai said, do you also put in amino acids? And you mentioned no, to that as well. There is a link in the chat for a better quality video. So that's good to see.

Q: Yes, I had put the link for the best criteria results ?? of the video.

R: Yes, thank you. And then a couple of good comments for thanking you, and bravo Joel.

And Hassan has a comment, the wine smell, taste and effect may take us to other parts of the universe, maybe. Maybe you'll have a special wine, you know, the galactic wine, or something, you have a special name for it.

K- Have you followed the wine sold? How do the people who consume it, feel like?

Q: Yes, we have begun now. (3:36). Because 2019 harvest is now in bottle, and they tested their taste it. It's very, very beautiful, beautiful.

K- But how does it feel? How do they feel, people feel with the drink? Because I remember, if I remember correctly, Lisa and Jim did some studies in the supermarket, and they saw people buying more of their products.

Q: Also our products are sold now.

K- Follow and see who drinks it? How they feel. If their drunkenness is more pleasurable the next morning after drinking a bottle, or is it the same as before. Someone says, how can we buy a bottle of wine, and these wines? You have to.

Q: I will send you Mr. Keshe. I will send you some bottles, if you want.

K- Yes, but we need the name of the brand. They are asking for, that they can ask for. If you give us the name of the brand they can buy, and we'll see if we can get the Knowledge Seekers drunk with it.

Q: All the harvest is sold now.

K- Yes, under what name?

Q: It is "Chateau Libby."

K- Okay, let's see if they can find it and they tell us what's happening with it. Thank you very much for the hard work. I know you're not going to stop.

R: One question, does he keep the tubes in a star formation? Or what other form? (3:38).

Q: No.

R: And I took this picture out of the video. Is this the formation that you use? Or is this just a demonstration?

Q: No, no. It's what I use. The weakest feed the strongest, it's all. We have no Star Formation.

K- Thank you very much. It's years of work in 18 minutes. It's not. It's not just ?? yet.

Q: Sorry for my English Mr. Keshe, and all the people.

K- Thank you very much. It was beautiful. Thank you very much for the presentation. Thank you very much. It's a long time since we have shown the work of the Knowledge Seekers. I hope a lot of us enjoyed and understand it, and I know a lot of people will use it, and we'll see what it becomes. Thank you very much Joel.

Is there anything else?

Q: Is it a pyramidal form? Is it a form of a pyramid? She's trying to find the form of the.

K- Grapes don't decide how they grow, do they? In pyramids or not. It's just how you distribute the fields.

As I said, this week we might show, (3:40). we try to show the new Enhancement Unit due to developments, new developments in, what you call it, the knowledge and extension of it. We'll try to do it next week, hopefully. Where we show the both, production of the gas and the energy unit.

We will put a cap on the sales of the generators very soon, that we can do work with other ?? science. People who place their order, please complete it. I know a lot of people are trying to get it done one way or another. Those people who wanted to do the Enhancement Unit for Moon and Mars, please complete this. Because we would like to start the preparation now, that we have you ready for the January, February. This might include even to bring you to Linz couple of times, to preset, to structure it the correct way

for the, what we call, the Moon testing. It's just that we bring everything together ready, that when it comes to January, February, when we start testing, we have a full, what you call, everything done in expansion of the Soul, we are understanding, we know what to do. Don't forget, we try to bring the succession ?? between three to five days.

It's not going to be you walking in and just taking the flight. In the future, ?? when you book, but for present time, in a way, we would like to prepare the ground for it, and we want to start in September, October to prepare you for that final, what I call, transmutation test. Please complete your forms, and the rest of it, which is connected to it. (3:42). We had a Knowledge Seekers ask us, cannot pay half of it now and half of it prior to fly. Yes, it can be done.

Please understand, you're entering a new space technology, where you won't take you hours to get to the Moon, it's instantaneous. Then we want to monitor what changes. After you come back, what monitors, we want to monitor what happens. The same as now, we monitor with some of the people who went through the Enhancement Unit in past few weeks. We are monitoring how's their response, what they do, and how things has changed around them. As we develop better, we want to understand how the process works, and how everything around us can be changed, can be affected. We'll see how things turn up in the coming weeks and days.

We'll literally explain it to you, as we go. This knowledge as it's learned, is shared, and no technology has ever been shared like this before. You see the patents three years, five years to come out, and then your limitation, of whatever. Knowledge shared literally step by step, day by day, amongst all of us, by all of us, with each other.

Thank you very much for today Rick. I hope those who buy the painting, or bought the painting, enjoy them, let us know exactly how it feels, and how what it brings to them. Thank you for today. And hopefully we'll see you next week.
